The Critique of Psychology Thomas Teo,2006-07-18 Closely paralleling the history of psychology is the history of its critics their theories and their contributions The Critique of Psychology is the first book to trace this alternate history from a unique perspective that complements the many existing empirical theoretical and social histories of the field Thomas Teo cogently synthesizes major historical and theoretical narratives to describe two centuries of challenges to and the reactions of the mainstream Some of these critiques of content methodology relevance and philosophical worldview have actually influenced and become integrated into the canon others pose moral questions still under debate All are accessibly presented so that readers may judge their value for themselves Kant s critique of rational and empirical psychology at the end of the 18th century The natural scientific critique of philosophical psychology in the 19th century The human scientific critique of natural scientific psychology The Marxist traditions of critique Feminist and postmodern critiques and the contemporary mainstream Postcolonial critiques and the shift from cross cultural to multicultural psychology This is not a book of critique for critique s sake Teo defines the field as a work in progress with goals that are evolving yet constant In emphasizing ethical and political questions faced by psychology as a discipline this visionary book points students academics and practitioners toward new possibilities for their shared future **Metaphysics of Consciousness** William Seager,2002-09-11 Metaphysics of

Consciousness opens with a development of the physicalist outlook that denies the need for any explanation of the mental This inexplicability is demonstrated not to be sufficient as refutation of physicalism However the inescapable particularity of modes of consciousness appears to overpower this minimal physicalism This book proposes that such an inference requires either a wholly new conception of how consciousness is physical or a deep and disturbing new kind of physical inexplicability

Modernizing the Mind Steven C. Ward, 2002-09-30 When did fidgety children begin to suffer from attention deficit disorder How did frightened people come to be called paranoid Why are we considered to have emotional intelligence and not simply caring personalities While psychological knowledge began in the relative isolation of laboratories and universities it has since permeated various professions institutions and everyday life Society and our conceptions of self have fundamentally changed with psychology s modernization of the mind Ward provides a social and cultural history of the spread of psychological knowledge assessing the way this proliferation has reconfigured society s meaning and the way people view themselves and others Using ideas borrowed from science and technology studies the sociology of culture and the sociology of organizations Ward examines how American psychology established itself as the central purveyor of truth about the mind and self in the 20th century He examines how psychology has essentially become common knowledge and his innovative account offers a novel theory about the growth and influence of numerous different knowledge forms

[Biologism - The Consequence of an Illusion](#) Manfred Velden, 2009-11-18 Biologism describes the idea that the science of biology supplies the means to exhaustively explain psychological processes It has become vastly popular

in recent decades Manfred Velden shows that this idea is illusory on fundamental and a priori grounds Several fields of inquiry are described where the biologicistic project has demonstrably failed like for example heritability estimates for mental traits like intelligence It is argued as well that biologism is just a further instance of an older more comprehensive and equally illusory concept psychology as a natural science a science that produces generally accepted basic facts for example the creation of a psychological risk factor for coronary disease It is shown that psychology masquerading as a natural science as it largely does may create serious societal problems like for example its misuse for racist purposes The peculiar use of methodology in psychology is also documented **Psychology** ,1932
