

PROCEDURE:

Rinse and fill the burette with potassium manganate(VII) solution C-10 (KMnO_4).

Pipette out 20 ml or 25 ml of the oxalic acid solution C-11 ($\text{H}_2\text{C}_2\text{O}_4 \cdot 2\text{H}_2\text{O}$) in a clean conical flask. To this, add 20 ml of dilute H_2SO_4 , C-12, specially provided for this purpose. Warm the contents of the flask to $60^\circ\text{C} - 70^\circ\text{C}$. The heating should be continued till the first bubble appears at the bottom of the flask.

Remove the conical flask from fire and titrate this solution by running solution C-10 from the burette. Shake the solution constantly till a permanent pale pink colour is obtained. Ensure that the pink colour obtained does not disappear on shaking the contents of the conical flask.

Repeat the above procedure to get at least two concordant readings.

Tabulate your readings.

State:

- (a) The capacity of the pipette used.
- (b) The titre value you intend to use in your calculations.

Show the titre value to the Visiting Examiner.

The equations for the above reactions are as follows:

Relative atomic masses:

Calculate the following:

- (i) The molarity of oxalic acid solution C-11.
- (ii) The molarity of potassium manganate (VII) solution C-10.
- (iii) The strength of potassium manganate(VII) solution in gms per litre.
- (iv) The percentage purity of the sample of potassium manganate (VII) solution.

Note: Molarity must be calculated upto at least 4 decimal places.

Chemistry Education and Contributions from

History and Philosophy of Science Mansoor Niaz, 2015-12-23 This book explores the relationship between the content of chemistry education and the history and philosophy of science HPS framework that underlies such education It discusses the need to present an image that reflects how chemistry developed and progresses It proposes that chemistry should be taught the way it is practiced by chemists as a human enterprise at the interface of scientific practice and HPS Finally it sets out to convince teachers to go beyond the traditional classroom practice and explore new teaching strategies The importance of HPS has been recognized for the science curriculum since the middle of the 20th century The need for teaching chemistry within a historical context is not difficult to understand as HPS is not far below the surface in any science classroom A review of the literature shows that the traditional chemistry classroom curricula and textbooks while dealing with concepts such as law theory model explanation hypothesis observation evidence and idealization generally ignore elements of the history and philosophy of science This book proposes that the conceptual understanding of chemistry requires knowledge and understanding of the history and philosophy of science Professor Niaz's book is most welcome coming at a time when there is an urgently felt need to upgrade the teaching of science The book is a huge aid for adding to the usual way presenting science as a series of mere facts also the necessary mandate to show how science is done and how science through its history and philosophy is part of the cultural development of humanity Gerald Holton Mallinckrodt Professor of Physics these are valence bond VB and molecular orbital MO theories He emphasizes the importance of having rival theories and interpretations in science and its advancement He further argues that this VB MO rivalry is still alive and together the two conceptual frames serve as the tool kit for thinking and doing chemistry in creative manners The author surveys chemistry textbooks in the light of the how the books preserve or not the balance between the two theories in describing various chemical phenomena This Talmudic approach of conceptual tension is a universal characteristic of any branch of evolving wisdom As such Mansoor's book would be of great utility for chemistry teachers to examine how can they become more effective teachers by recognizing the importance of conceptual tension Sason Shaik Saere K and Louis P Fiedler Chair in Chemistry Director The Lise Meitner Minerva Center for Computational Quantum Chemistry The Hebrew University of Jerusalem ISRAEL *The Role of Nutritional Strategies in the Regulation of Gut Microbiota and Host Immune System* Li Wang, Caihong Hu, Ming Fan, 2024-12-17 The gut microbiota not only plays important roles in many metabolic pathways but it also provides the host with a variety of functions that promote immune homeostasis immune responses and prevent pathogen colonization The gut microbiota as well as their metabolites and components are required for immune homeostasis and influence host susceptibility to a wide range of immune mediated diseases and disorders The composition of the gut microbiota influences immune system development and modulates immune mediators which in turn affects the function of the intestinal barrier To this end This Research Topic aims to present and discuss the most recent evidence on the role of nutritional strategies in regulating gut microbiota and host immune system which will assist in understanding how nutritional

strategies can promote immunity homeostasis and intestinal barrier function via the gut microbiota Enhanced weathering and synergistic combinations with other CDR methods Jens Hartmann,David Beerling,Mathilde Hagens,Sara Vicca,2023-07-27 Coffee in Health and Disease Prevention Victor R Preedy,Vinood Patel,2024-09-14 Coffee in Health and Disease Prevention Second Edition presents a comprehensive look at the compounds in coffee their benefits or adverse effects and explores coffee as it relates to specific health conditions Embracing a holistic approach this book covers the coffee plant coffee production and processing the major varieties of coffee and its nutritional and compositional properties Coffee s impact on human health disease risk and prevention comprises the majority of the text Diseases covered including Alzheimer s anxiety and depression asthma diabetes cancer and more This book also covers coffee s impact on organs and organ systems including the cardiovascular system the nervous system and the gut microbiome Coffee in Health and Disease Prevention Second Edition is the only book on the market that covers all varieties of coffee in one volume and their potential benefits and risks to human health This is an essential reference for researchers in nutrition dietetics food science biochemistry and public health Presents a comprehensive translational source on the role of coffee in disease prevention and health Focuses on coffee s nutritional and protective aspects as well as specific coffee components and their effects on tissue and organ systems Offers a one stop shop for research in this area compiling both foundational and cutting edge topics into one resource Includes a dictionary of key terms other health effects of coffee or extracts and a summary points section within each chapter for a quick reference Antimicrobial and Anticancer Peptides Neil M. O'Brien-Simpson,Ralf Hoffmann,C.S. Brian Chia,John D. Wade,2018-05-03 In 2014 the World Health Organization WHO listed cancer as the second leading cause of death and highlighted antimicrobial resistance as a key global health challenge that may in a worst case scenario lead to an annual death toll of 10 million by 2050 which would exceed predicted cancer deaths by 20% Novel promising therapeutic options to reduce morbidity and mortality of both infectious microbial diseases and cancer are being developed based on antimicrobial peptides AMPs i e evolutionary proven antibiotics that also possess anti cancer activities Intriguingly AMPs and anti cancer peptides ACPs rely typically on novel mechanisms and cellular targets not used by current antibiotics or chemotherapeutics Initiated by presentations at the International Meeting of Antimicrobial Peptides in 2016 IMAP 2016 hosted at Leipzig University Germany this book compiles the most recent strategies and promising lead compounds for treating multi and pan resistant microbes and chemo resistant cancer cells in fourteen different chapters representing leading research groups from five different continents In this respect the book shall stimulate new avenues of thinking and strategies in tackling forthcoming antimicrobial and cancer resistance health threats with the hope that the scenarios recently reported by the WHO will never eventuate Defining Effective Transboundary Water Cooperation Melissa McCracken,2022-03-30 This book establishes a framework for defining transboundary water cooperation and a methodology for evaluating its effectiveness which will contribute to more effective and therefore successful cooperation processes With

the increasing focus on transboundary cooperation as a part of the Sustainable Development Goal Framework there is global recognition of transboundary water cooperation as a tool for improved governance and management of transboundary surface and groundwaters However there is not an agreed upon definition of transboundary water cooperation in the literature or in practice This book develops the Four Frames of Transboundary Water Cooperation which is a neutral modular framework for developing context specific explanatory definitions of transboundary water cooperation in basins and aquifers The Four Frames of Cooperation are legal institutional relational and outcome However we need to move beyond defining cooperation to understand better measures of the quality and effectiveness of cooperative processes The Weighted Model of Effective Cooperation presents a first step in qualitatively evaluating the effectiveness of transboundary water cooperation This model defines effective transboundary water cooperation and operationalizes a method to evaluate the effectiveness of cooperative processes over internationally shared waters Effective cooperation emphasizes the relational and outcome frames of cooperation while working towards equitability and sustainability Together the Four Frames of Cooperation and the Weighted Model of Effective Cooperation will improve the understanding of cooperation and encourage a detailed evaluation of the quality success and effectiveness of cooperative processes This book will be of great interest to students and scholars of water resource management water governance and environmental politics It will also appeal to policymakers and professionals working in the fields of water conflict water diplomacy and international cooperation Multidisciplinary Research in Arts, Science & Commerce (Volume-13) Chief Editor- Biplab Auddya, Editor- Prof. Prabhjot Kaur, Dr. Mandeep Kaur, Dr. Reghunath K, Dr. Yalla Poli Naidu, Dr. Jayanti Jatav, Prof. Abhilash T P, 2024-12-05
