the Crises: Zimbabwe Prospects for Transformation Tendai Murisa, Tendai Chikweche, 2015-12-01 Over the past years few African countries have been the focus of discussions and analyses generating a vast array of literature as much as Zimbabwe. The socioeconomic and political crises since the turn of the century have deeply transformed the country from the ideals of a vibrant freshly independent nation just two decades earlier. These transformations have necessitated the call for the restructuring of Zimbabwean society, polity and economy. But this literature remains exclusively within the realm of academic thinking and theorising with no concerted effort to move beyond this by explicitly drawing out the policy implications. Beyond the Crises: Zimbabwe Prospects for Transformation is a welcome addition to the academic and policy literature with a much broader and all embracing focus in terms of policy interventions. By focusing on different aspects of social and economic justice, Murisa and Chikweche go beyond initiating a broad discussion on these two key pillars of human development with a view to suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans.

Contemporary Development Ethics from an African Perspective Beatrice Okyere-Manu, Stephen Nkansah Morgan, Ovet Nwosimiri, 2023-07-29 This book offers fresh academic insights, reflections, questions, issues and approaches to development ethics taking into account African values and ethics. Development ethics is an area of applied ethics that examines the moral issues involved in global social and economic transformation. While it is a relatively new discipline, there have been numerous scholarly publications on it from Western perspectives. However, only a few studies have focused on development ethics from the African perspective. To address this gap, the book seeks to answer critical questions such as: What does development mean to Africans? How can we measure development? Who gets to decide and what constitutes just development in Africa? With contributions from African scholars from diverse backgrounds, the book covers various development themes such as Theories and approaches to development ethics in Africa, Environmental Ethics and African Development Ethics, Politics and African Development, Migration and African development, Gender Ethics and Socio-economic Development in Africa, Education Ethics and African development. It is an essential resource for researchers, lecturers and students interested in political philosophy and African culture studies.

Aid and Authoritarianism in Africa Tobias Hagmann, Professor Filip Reyntjens, 2016-03-15 In 2013 almost half of Africa's top aid recipients were ruled by authoritarian regimes While the West may claim to promote democracy and human rights in practice major bilateral and international donors such as USAID DFID the World Bank and the European Commission have seen their aid policies become ever more entangled with the survival of their authoritarian protégés Local citizens thus find themselves at the receiving end of a compromise between aid agencies and government elites in which development policies are shaped in the interests of maintaining the status quo Aid and Authoritarianism in Africa sheds light on the political intricacies and moral dilemmas raised by the relationship between foreign aid and autocratic rule in Africa Through contributions by leading experts exploring the revival of authoritarian development politics in Ethiopia Uganda Rwanda Cameroon Mozambique and Angola the book exposes shifting donor interests and rhetoric as well as the impact of foreign aid

on military assistance rural development electoral processes and domestic politics In the process it raises an urgent and too often neglected question to what extent are foreign aid programmes actually perpetuating authoritarian rule

There is a growing body of work on white farmers in Zimbabwe Yet the role played by white women so called farmers wives on commercial farms has been almost completely ignored if not forgotten For all the public role and overt power ascribed to white male farmers their wives played an equally important although often more subtle role in power and labour relations on white commercial farms This soft power took the form of maternalistic welfare initiatives such as clinics schools orphan programmes and women s clubs mostly overseen by a farmer s wife Before and after Zimbabwe s 1980 independence these played an important role in attracting and keeping farm labourers and governing their behaviour After independence they also became crucial to the way white farmers justified their continued ownership of most of Zimbabwe s prime farmland This book provides the first comprehensive analysis of the role that farm welfare initiatives played in Zimbabwe s agrarian history

Having assessed what implications such endeavours had for the position and well being of farmworkers before the onset of fast track land reform in the year 2000 Hartnack examines in vivid ethnographic detail the impact that the farm seizures had on the lives of farmworkers and the welfare programmes which had previously attempted to improve their lot Reclaiming Africa Sam Moyo, Praveen Jha, Paris Yeros, 2018-09-03 This book presents the findings of research conducted by scholars and activists associated with the Agrarian South Network based mainly in Africa Asia and Latina America The research articulates a Southern perspective on the new scramble for Africa with a view to strengthen tri continental solidarities The book explains the significance of the new scramble in terms of the economic structures inherited from the late nineteenth century scramble and the subsequent post independence period The renewed competition for Africa s land and natural resources and the resumption of economic growth at the turn of the millennium have revived concerns regarding the continent s position in the world economy and the prospects for its development in the twenty first century In this regard the book addresses two related issues the character of the expansion of Southern competitors in relation to the more established Western strategies and the impact of the renewed influx of investments inland minerals and associated infrastructure The findings are presented with empirical rigor and conceptual clarity to enable the reader to grasp what really is at stake in the twenty first century an epic struggle to reclaim Africa from the monopolies that exercise control over its land minerals labour and destiny
