Mandinach, Edith S. Gummer, 2021

This volume brings together experts on various aspects of education to address many of the emerging issues and problems that affect how data are being used or misused in educational contexts. Readers will learn about the importance of using data effectively responsibly and ethically to fully understand how cognitive fallacies occur and how they impact decisionmaking. They will understand how codes of ethics deal with the use of data within education as well as in other disciplines. Chapters provide a landscape view of the regulations that pertain to data use and policies that have emerged including the impact of accountability on data use and data ethics. The text covers data ethics in local education agencies, professional development, educator preparation, testing programs, and educational technology. Chapter authors recommend steps to improve awareness among educators, stakeholders, and other interested groups and suggest actions that can be taken to enhance educators' capacity to use data responsibly. A final use case chapter describes the importance of data ethics in terms of equity in schools and includes salient examples of ethical dilemmas with questions and reflections on how ethics and equity apply to each situation. The conclusion addresses data ethics in terms of professionalism and poses several recommendations to challenge educators in ways to raise awareness of and integrate data ethics into educational practice.

Book Features: Discusses how accountability affects effective data including the pressure on schools and districts to perform better on test scores or other indicators. Outlines ten recommendations for how professional development can incorporate data ethics in practice. Reviews the expectations and realities of preparing educators for data literacy including an example of one teacher education program's integrated curriculum-wide approach. Considers the role of testing companies in ethical data use including issues around equity in assessment data. Explores how educational technologies, platforms, and applications impact data use.

What Schools Don't Teach Brad Johnson, Julie Sessions, 2014-10-30. Are we adequately preparing students for life beyond school doors? Schools teach students not to be competitive and never to fail. Yet in the real world, people compete for jobs and they often fail many times before reaching success. In this thought-provoking book, authors Johnson and Sessions describe 20 skills that are overlooked in schools and in educational standards but that are crucial to real-world success. They describe how you can develop these skills in your students no matter what subject area or grade level you teach. You'll learn how to promote leadership, allow competition, encourage meaningful engagement, help students find their voice, incorporate edutainment and pop culture, motivate towards excellence, hold students accountable and responsible, foster perseverance, and the ability to learn from failure, teach effective communication, and much more. Each chapter includes insightful research, thought-provoking stories, and practical strategies that you can take back to your own classroom.

most daunting graduate school requirement is the development of an action research Masters thesis This capstone task requires unprecedented amounts of time energy and verbiage Designed to take stress out of the thesis writing equation this student friendly comprehensive handbook glides the reader through a 28 step process from developing a focal topic to defending a scholarly thesis Framing each chapter as a one week action assignment the authors have broken down the process into manageable chunks to enable students writers to achieve an immediate sense of completion at every step By using this scaffolding approach the the authors encourage the student researcher to focus on one part of the process rather than the total sometimes overwhelming final product With the exception of the Review of the Literature section which takes several weeks to complete all other thesis sections can and should be timed out for seven days The Authors primary objective was to empower the student researcher to accomplish each of the steps in the process while never losing sight of the product that will help the children in their classrooms Whether developing an Abstract or writing in text citations student researchers are guided throughout the nuances of the Publication Manual of the American Psychological Association's 6th Edition
