Model Rules is already posing significant challenges for taxation authorities worldwide. Intended to establish a floor in the possibilities for countries to compete for corporate investment with each other in the field of corporate income taxation, the Pillar 2 Rules arising from the OECD G20 Inclusive Framework have been agreed on by 140 countries. This book provides the first in-depth survey of the implications of the Rules for all stakeholders with detailed annotations by nineteen renowned experts in the field of multinational corporate taxation who describe the relevant provisions with examples and considerations addressing their scope, functioning and interaction. Undergirded by a comprehensive discussion of the Rules, their technical operation and the administrative guidance provided by OECD, topics covered include the following: definitions of tax terms for Pillar 2 purposes; computation of income or loss adjusted covered taxes; effective tax rate and top-up tax; jurisdictional blending and loss offsets; effect of corporate restructurings and holding structures; excluded categories of income; carve-out opportunities under the Substance-Based Income Exclusion (SBIE); transitional country-by-country and time-limited safe harbours; and differences and interactions between the OECD Global Anti-Base Erosion (GloBE) and both the EU Pillar 2 Directive and the US Global Intangible Low-Taxed Income (GILTI) regimes. It has been estimated that the GloBE reform would produce a worldwide additional tax revenue of USD 200 billion annually. It has thus become imperative for taxation authorities, tax practitioners and multinational corporate counsel to become as aware as possible of the intricacies of the Pillar 2 Rules, and for this reason, this detailed discussion and analysis will be greatly appreciated by taxation professionals worldwide.
