Back in the Game Jeffrey S. Kutcher, Joanne C. Gerstner, 2017 The word concussion was unheard of in youth sports a decade ago The injury was indeed occurring but youth athletes were often told to shake it off after getting their bell rung Science and increased awareness about concussion and brain health have transformed the way youth parents coaches and players pursue athletics Fear of incurring concussions as well as incomplete or incorrect information is leading some parents to keep their children out of contact sports such as football and soccer where concussion is more prevalent Back in the Game Why Concussion

Doesn't Have to End Your Athletic Career does not dwell on perpetuating fears but rather provides the most up to date understanding of the condition. This is a real world discussion of what science and medicine know, what parents and coaches need to understand about concussion evaluation and treatment and what possible post concussive issues exist. The expertise and experiences of noted sports neurologist Jeffrey S Kutcher MD along with reporting and interviews by award winning sports journalist Joanne C Gerstner make this book a timely relevant and real discussion about concussions in youth sports. Athletes and professional coaches who have participated in the formation of this book include two time Olympic gold medalist soccer player Kate Markgraf former NHL Team Canada head coach Andy Murray champion X Games snowboarder Ellery Hollingsworth along with an array of youth parents coaches and athletes from across the country. Quebec Cinema in the 21st Century Michael Gott, Thibaut Schilt, 2024-02-06 This collection of ten chapters and three original interviews with Quebec filmmakers focuses on the past two decades of Quebec cinema and takes an in depth look at a primarily Montreal based filmmaking industry whose increasingly diverse productions continue to resist the hegemony of Hollywood and to exist as a visible and successful hub of French language and ever more multilingual cinema in North America. This volume picks up where Bill Marshall's 2001 *Quebec National Cinema* ends to investigate the inherently global nature of Quebec's film industry and cinematic output since the beginning of the new millennium. Through their analyses of contemporary films *Une colonie* *Avant les rues* *Bon cop* *bad cop* *Les Affamés* *Tom la ferme* *Uvanga* among others directors including Xavier Dolan Denis Côté Sophie Desrues Chloé Robichaud Jean-Marc Vallée and Monia Chokri and genres such as the buddy comedy and the zombie film our authors examine the growing tension between Quebec cinema as a national cinema and as an art form that reflects the transnationalism of today's world a new form of fluidity of individual experiences and an increasing on screen presence of Indigenous subjects both within and outside the borders of the province. The book concludes with specially conducted interviews with filmmakers Denis Chouinard Bachir Bensaddek and Marie-Hélène Cousineau who provide their views and insights on contemporary Quebec filmmaking. *Bullying* Azhar ul Haque Sario, 2024-11-26 Dive into the complex world of bullying with *Bullying Culture Prevention*. The Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions Fabiana Battista, Antonietta Curci, Ivan Mangiulli, Henry Otgaar, 2024-08-02 The

fallibility of memory has been often demonstrated. A plethora of studies has focused on external influences that can affect memory reports such as suggestive questioning. Adopting different paradigms e.g. misinformation, memory conformity, the recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced i.e. commission errors, false details. In addition, suggestion can make them unable to recall truly experienced events or event-related details. However, internal influences can also affect memory. One such internal influence is deception. In the last decade, several studies have investigated how memory can be affected by deception. Specifically, these studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event. This line of research examined the detrimental effects on memory by taking into account different strategies to deceive e.g. false denials, feigned amnesia, and fabrication and found that the memory outcomes due to deception can vary based on the strategy used to deceive. A number of studies has also demonstrated that another type of deception known as self-deception can influence our memory. This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories. The understanding of the effects of external e.g. suggestion and internal e.g. deception, self-deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context. Memory distortions, for example, inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions. Several studies have underlined the harmful consequences of distorted statements. Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases, for instance www.innocenceproject.org. Therefore, it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice.
