Thinking Geometrically Thomas Q. Sibley, 2015-08-14 Thinking Geometrically A Survey of Geometries is a well written
and comprehensive survey of college geometry that would serve a wide variety of courses for both mathematics majors and
mathematics education majors Great care and attention is spent on developing visual insights and geometric intuition while
stressing the logical structure historical development and deep interconnectedness of the ideas Students with less
mathematical preparation than upper division mathematics majors can successfully study the topics needed for the
preparation of high school teachers There is a multitude of exercises and projects in those chapters developing all aspects of
geometric thinking for these students as well as for more advanced students These chapters include Euclidean Geometry
Axiomatic Systems and Models Analytic Geometry Transformational Geometry and Symmetry Topics in the other chapters
including Non Euclidean Geometry Projective Geometry Finite Geometry Differential Geometry and Discrete Geometry
provide a broader view of geometry The different chapters are as independent as possible while the text still manages to
highlight the many connections between topics The text is self contained including appendices with the material in Euclid's
first book and a high school axiomatic system as well as Hilbert's axioms Appendices give brief summaries of the parts of
linear algebra and multivariable calculus needed for certain chapters While some chapters use the language of groups no
prior experience with abstract algebra is presumed The text will support an approach emphasizing dynamical geometry
