Lorenz,Joan Coates,Marc Kent,2010-12-07 Handbook of Veterinary Neurology provides quick access to vital information on  
neurologic conditions in a wide range of species including canine feline bovine caprine equine ovine and porcine A problem  
oriented approach makes it easy to diagnose and treat neurologic problems in small and large animals The coverage of  
disorders by problem not by established disease diagnosis emulates how animals present to the veterinary hospital and  
simplifies the formulation of a correct diagnosis Within each chapter discussions of neurologic disease include a review of the  
localization criteria and the diseases that can cause that problem plus treatment and surgical techniques Lead author  
Michael D Lorenz brings decades of experience to neurologic assessment using a diagnostic approach that requires minimal  
knowledge of neuroanatomy A problem based approach is organized by presenting sign rather than by condition guiding you  
to logical conclusions regarding diagnosis and treatment Algorithms diagram the logic necessary to localize lesions and to  
formulate diagnostic plans Coverage of current diagnostic techniques includes the use of diagnostic tools such as radiology  
spinal fluid analysis electrodiagnosis and MR imaging Case histories in each chapter present a problem and the results of the  
neurologic examination then ask you to solve the problem by localizing the lesion listing probable causes and making a  
diagnostic plan Answers are provided at the back of the book A consistent format for each case history includes signalment  
history physical examination findings and neurologic examination A comprehensive appendix describes species and breeds  
that have a congenital predisposition for particular neurologic diseases Extensive references make it easy to pursue in depth  
research of more advanced topics A companion website includes 20 narrated video clips with accompanying PowerPoint  
slides that correlate to the case histories in the book covering neurologic assessment and clinical problems such as paresis of  
one limb tetraparesis stupor seizures ataxia of the head and limbs and cranial nerve disorders Two new co authors Jean  
Coates and Marc Kent board certified in neurology enhance the credibility of this edition A full color design and numerous
