Mastery Orientation Through Task-focused Goals Christopher James Boys, 2003 **Reshaping College Mathematics**
Mathematical Association of America. Committee on the Undergraduate Program in Mathematics, 1989 *Personnel
Management for Effective Schools* John T. Seyfarth, 1991 The aim of this book is to alert prospective and practicing school
administrators to the wide range of activities covered by the term personnel management and to present the best of current
practice in the field The broad scope of the text illuminates the relationships between present and future personnel staff
members directors of instruction and Principals or Assistant Principals The text also demonstrates their common goal of
improving the school system *MAA Notes*, 1983 **Resources in Education**, 1999 **Standards-based School
Mathematics Curricula** Sharon L. Senk, Denise R. Thompson, 2020-07-24 The Curriculum and Evaluation Standards for
School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of
mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of
Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula
work To answer these questions the editors invited researchers who had investigated the implementation of 12 different
Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and
to provide evidence for any claims they made In particular authors were asked to identify content on which performance of
students using Standards based materials differed from that of students using more traditional materials and content on
which performance of these two groups of students was virtually identical Additionally four scholars not involved with the
development of any of the materials were invited to write critical commentaries on the work reported in the other chapters
Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum
reform efforts in perspective a summary of recent recommendations to reform school mathematics and a discussion of issues
that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics
curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy
Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It
provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes
additional recommendations for further research In addition to the references provided at the end of each chapter other
references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable
resource for all participants in discussions about school mathematics curricula including professors and graduate students
interested in mathematics education curriculum development program evaluation or the history of education educational
policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical
evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed

civil discourse about the goals and methods of school mathematics curricula and related research

Content-Based Curriculum for Advanced Learners Joyce VanTassel-Baska, Catherine A. Little, 2023-01-23 The fourth edition of Content Based Curriculum for Advanced Learners provides readers with a complete and up to date introduction to core elements of curriculum development in gifted education with implications for school based implementation Written by key experts in the field this text is essential to the development of high powered rich and complex curricula that treat content process product and concept development considerations as equal partners in the task of educating gifted learners Along with revised chapters this edition contains new chapters on culturally responsive curriculum the performing arts robotics and engineering design as well as social and emotional learning Additional material concerning talent trajectories across the lifespan accompanies a discussion of honors curriculum in higher education rounding out this comprehensive resource This master text is a must read for educators interested in executing effective curriculum and instructional interventions to support learning for gifted and advanced learners

RTI in Math William N. Bender, Darlene N. Crane, 2010-08-01 This map of the RTI process offers an overview of research detailed guidance through each stage of implementation tools for teacher reflection and growth and discussion of support strategies beyond the classroom The authors analyze a variety of common student difficulties in elementary math and apply a three tier RTI model to the general education classroom

Mathematics Teachers at Work Janine T. Remillard, Beth A. Herbel-Eisenmann, Gwendolyn M. Lloyd, 2011-09-20 This book compiles and synthesizes existing research on teachers use of mathematics curriculum materials and the impact of curriculum materials on teaching and teachers with a particular emphasis on but not restricted to those materials developed in the 1990s in response to the NCTM's Principles and Standards for School Mathematics Despite the substantial amount of curriculum development activity over the last 15 years and growing scholarly interest in their use the book represents the first compilation of research on teachers and mathematics curriculum materials and the first volume with this focus in any content area in several decades

Learning from the Federal Market-Based Reforms William J. Mathis, Tina M. Trujillo, 2016-06-01 Over the past twenty years educational policy has been characterized by top down market focused policies combined with a push toward privatization and school choice The new Every Student Succeeds Act continues along this path though with decision making authority now shifted toward the states These market based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement But has this approach been successful Has learning improved Have historically low scoring schools turned around or have the reforms had little effect Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy This book presents the evidence Drawing on the work of the nation's most prominent researchers the book explores the major elements of these reforms as well as the social political and educational contexts in which they take place It examines the evidence supporting the most common school improvement strategies school choice reconstitutions or

massive personnel changes and school closures From there it presents the research findings cutting across these strategies by addressing the evidence on test score trends teacher evaluation miracle schools the Common Core State Standards school choice the newly emerging school improvement industry and re segregation among others The weight of the evidence indisputably shows little success and no promise for these reforms Thus the authors counsel strongly against continuing these failed policies The book concludes with a review of more promising avenues for educational reform including the necessity of broader societal investments for combatting poverty and adverse social conditions While schools cannot single handedly overcome societal inequalities important work can take place within the public school system with evidence based interventions such as early childhood education detracking adequate funding and full service community schools all intended to renew our nation s commitment to democracy and equal educational opportunity
