Rule Title: The system must use a separate file system for /tmp.
STIG ID: RHEL-08-000001 **Rule ID:** SR-50255r1_rule **Multi ID:** V-38495
Severity: CAT II Class: Unclass

Discussion:

The '/tmp' partition is used as temporary storage by many programs. Placing '/tmp' in its own partition enables the setting of more restrictive mount options, which can help protect programs which use it.

Documentation:

Check Content:

Run the following command to determine if '/tmp' is on its own partition or logical volume:

```
$ mount | grep 'on /tmp'
```

If '/tmp' has its own partition or volume group, a line will be returned.

If no line is returned, this is a finding.

File Tests:

The '/tmp' directory is a world-writable directory used for temporary file storage. Ensure it has its own partition or logical volume at installation time, or migrate it using LVM.
