Emerging Technologies to Promote and Evaluate Physical Activity Dan J Graham, James Aaron Hipp, Simon Marshall, Jacqueline Kerr, 2014-10-23 Increasingly efforts to promote and measure physical activity are achieving greater precision greater ease of use and or greater scope by incorporating emerging technologies This is significant for physical activity promotion because more precise measurement will allow investigators to better understand where when and how physical activity is and is not occurring thus enabling more effective targeting of particular behavior settings Emerging technologies associated with the measurement and evaluation of physical activity are noteworthy because

- 1 Their ease of use and transferability can greatly increase external validity of measures and findings
- 2 Technologies can significantly increase the ability to analyze patterns
- 3 They can improve the ongoing systematic collection and analysis of public health surveillance due to real time capabilities associated with many emerging technologies
- 4 There is a need for research and papers about the cyberinfrastructure required to cope with big data multiple streams processing aggregation visualization etc and
- 5 Increasingly blurred boundaries between measurement and intervention activity e g the quantified self self tracking movement may necessitate a reevaluation of the conventional scientific model for designing and evaluating these sorts of studies

There have been many recent disparate advances related to this topic Advances such as crowdsourcing

allow for input from large diverse audiences that can help to identify and improve infrastructure for activity e g large group identification of environmental features that are conducive or inhibiting to physical activity on a national and even global scale Technologies such as Global Positioning Systems GPS and accelerometry are now available in many mobile phones and can be used for identifying and promoting activity and also understanding naturalistically occurring activity SenseCam and other personal visual devices and mobile apps provide person point of view context to physical activity lifestyle and timing Further multiple sensor systems are enabling better identification of types of activities like stair climbing and jumping that could not previously be identified readily using objective measures like pedometers or accelerometers in isolation The ability of activity sensors to send data to remote servers allows for the incorporation of online technology e g employing an online social network as a source of inspiration or accountability to achieve physical activity goals and websites such as Stickk com enable individuals to make public contracts visible to other users and also incorporates financial incentives and disincentives in order to promote behaviors including physical activity In addition the increasing use of active gaming e g Wii XBox Kinect in homes schools and other venues further underscores the growing link between technology and physical activity

Improvements in mathematical models and computer algorithms also allow greater capacity for classifying and evaluating physical activity improving consistency across research studies Emerging technologies in the promotion and evaluation of physical activity is a significant area of interest because of its ability to greatly increase the amount and quality of global recorded measurements of PA patterns and its potential to more effectively promote PA Emerging technologies related to physical activity build on our own and others interdisciplinary collaborations in employing technology to address public health challenges This research area is innovative in that it uses emerging resources including social media crowdsourcing and online gaming to better understand patterns of physical activity

Adaptation and Aftereffects Rocco Palumbo, Stefania D'Ascenzo, Luca Tommasi, 2017-04-28 Aftereffects generally occur after a prolonged exposure adaptation to a first stimulus possessing one given property followed by presentation of a stimulus bearing a neutral value of that property The aftereffect consists in a change in appearance of the neutral stimulus following the adapter compared to the appearance of the neutral stimulus when it is perceived without any previous exposure to the adapter The transient phenomena of perceptual aftereffects are believed to depend on the activation of neuron populations that respond selectively to a given property of the stimuli Studying how adaptation occurs which stimulus properties are sensitive to it which timings are necessary whether individual differences modulate its occurrence has thus become an indirect way to probe the plasticity of sensory functions in the nervous system recently extending to more cognitive and representational aspects of neural coding In the last two decades indeed it has been demonstrated that aftereffects occur not only for low level properties of stimuli such as motion color or orientation but also for high level properties Many studies have proven that high level properties of the stimuli e g gender identity ethnicity or age of a face or a voice are sensitive to this phenomenon It has been shown for example that the prolonged exposure to a female or male face produces a gender misperception in the opposite direction when an androgynous face is shown after the adapter Furthermore recent studies have also shown that aftereffects are not strictly contingent upon the physical features that make up stimuli but they seem to run across the high level properties subjects are adapted to These evidences are supported by cross category adaptation studies which underlie how aftereffects occur even across stimuli that do not share physical features e g bodies and faces but that instead share common higher level properties such as gender Given the growing body of research focused on adaptation and aftereffects in high level perception at the boundaries with perceptual learning attention and cognition the purpose of this topic is to provide a picture of the state of the art relative to the specific phenomena of adaptation in high level perceptual processing Against Individualism Henry Rosemont Jr., 2015-03-25 The first part of Against Individualism A Confucian Rethinking of the Foundations of Morality Politics Family and Religion is devoted to showing how and why the vision of human beings as free independent and autonomous individuals is and always was a mirage that has served liberatory functions in the past but has now become pernicious for even thinking clearly about much less achieving social and economic justice maintaining democracy or addressing the manifold environmental and other problems facing the world today In the second and larger part of the book Rosemont proffers a different vision of being human gleaned from the texts of classical Confucianism namely that we are first and foremost interrelated and thus interdependent persons whose uniqueness lies in the multiplicity of roles we each live throughout our lives This leads to an ethics based on those mutual roles in sharp contrast to individualist moralities but which nevertheless reflect the facts of our everyday lives very well The book concludes by exploring briefly a number of implications of this vision for thinking

differently about politics family life justice and the development of a human centered authentic religiousness This book will be of value to all students and scholars of philosophy political theory and Religious Chinese and Family Studies as well as everyone interested in the intersection of morality with their everyday and public lives *The SAGE Handbook of Social Media Research Methods* Luke Sloan,Anabel Quan-Haase,2017-01-28 The SAGE Handbook of Social Media Research Methods offers a step by step guide to overcoming the challenges inherent in research projects that deal with big and broad data from the formulation of research questions through to the interpretation of findings The handbook includes chapters on specific social media platforms such as Twitter Sina Weibo and Instagram as well as a series of critical chapters The holistic approach is organised into the following sections Conceptualising Designing Social Media Research Collection Storage Qualitative Approaches to Social Media Data Quantitative Approaches to Social Media Data Diverse Approaches to Social Media Data Analytical Tools Social Media Platforms This handbook is the single most comprehensive resource for any scholar or graduate student embarking on a social media project **Cultures of Conflict Resolution in Early Modern Europe** Stephen Cummins,Laura Kounine,2017-05-15 Disputes discord and reconciliation were fundamental parts of the fabric of communal living in early modern Europe This edited volume presents essays on the cultural codes of conflict and its resolution in this period under three broad themes peacemaking as practice the nature of mediation and arbitration and the role of criminal law in conflicts Through an exploration of conflict and peacemaking this volume provides innovative accounts of state formation community and religion in the early modern period *Sexual Predation and TEFL* Vaughan Rapatahana,2024-12-16 Teaching English as a Foreign Language TEFL enables sexual predation across the wide range of activities and locales it encompasses beyond schools and inclusive of voluntourist and aid programmes where EFL is taught This predation is carried out not only by male Native speaking English Teachers NETs on their students peers and members of local communities but also carried out on female NETs and EFL students by locals Is TEFL inherently sexist utilising gender biased texts This book is the first to examine in considerable detail such English language sexual imperialism and to suggest ways to curtail it *Language by mouth and by hand* Iris Berent,Susan Goldin-Meadow,2015-05-11 While most natural languages rely on speech humans can spontaneously generate comparable linguistic systems that utilize manual gestures This collection of papers examines the interaction between natural language and its phonetic vessels human speech or manual gestures We seek to identify what linguistic aspects are invariant across signed and spoken languages and determine how the choice of the phonetic vessel shapes language structure its processing and its neural implementation We welcome rigorous empirical studies from a wide variety of perspectives ranging from behavioral studies to brain analyses diverse ages from infants to adults and multiple languages both conventional and emerging home signs and sign languages **Defending Traditional Islam in Indonesia** Syamsul Rijal,2023-12-01 Defending Traditional Islam in Indonesia examines the rise of young preachers of Arab descent habaib and their sermon groups in the region and shows how Islam

and politics coexist flourish interlace and strive in Indonesia in complex pragmatic and mutually beneficial relationships The book argues that the emergence of Arab preachers in the late 1990s when traditional forms of Islamic authority came under growing challenge from a diverse array of Muslim groups and ideologies is closely tied to contestation between traditionalists and their puritanical rivals the Salafi Wahhabi Not only have the habaib featured prominently in defending traditionalism they have also used this contestation as an opportunity to build their authority and religious capital through marketisation and their ties to the Middle East The author explores the ways in which habaib promote themselves to the mostly young urban Muslim community and also analyses the use of new media and marketing strategies by habaib to attract young followers The use of merchandise utilising popular culture and group identity markers is especially salient in the preachers outreach to urban audiences In addition public staging and entertainment during preaching activities are means by which the habaib cast their Islamic preaching dakwah as the Prophet s mission and encourage their followers participation A novel socio cultural and religious study and a contribution to the growing discussion on new media market and religion this book will be of interest to anthropologists social scientists and area studies scholars interested in Indonesia Southeast Asia and Islamic studies Comparative CSR and Sustainability Gabriel Donleavy, Carlos Noronha, 2022-12-30 This book breaks new

ground by providing a structured and cohesive set of contributions on the actions developments problems and theories of corporate social responsibility CSR With new case studies from the UN s Least Developed Countries LDCs contributors in this book investigate how firms in Eastern and Western countries are responding to and making use of evolving CSR guidelines The book addresses the following questions is CSR simply greenwashing or an authentic commitment to responsible corporate citizenship Has globalization drawn CSR conduct in LDCs closer to that of industrialized countries Stakeholder theory actor network theory and a new orbital theory of accountability are applied to give coherence to the case studies Other chapters address greenwashing in reports the impact of CSR in socially stigmatized occupations an analysis on what responsibility precisely entails in CSR and the interface between law and CSR The book also considers the impact of COVID 19 on the hospitality industry and includes a contribution from Ukrainian scholars one written while their city of Kharkiv was under attack by Russian forces This book will be a useful reference to those interested in discussions on crises climate change and SDGs and realizing sustainable goals through CSR *Ulysses S.
