Responsibility in Developing Countries Steven Kayambazinthu Msosa, Shame Mugova, Courage Mlambo, 2023-06-20 This book examines corporate social responsibility theories and models in the context of developing countries. The developing countries are amongst the poorest countries of the world despite vast natural resources. The natural resources are mismanaged, proceeds are misappropriated, corruption and conflict are centered on resource control. Governments and Multinational Corporations (MNCs) are at the centre of the controversy of corporate social responsibility (CSR) in the affected countries. Moreover, the lack of systems, procedures and legislation to enforce CSR has led to environmental degradation and a decline in business ethics and morality. This book analyses Corporate Social Responsibility in developing countries with specific reference to the extractive industry by integrating academic and industrial perspectives. It will be of interest to researchers in the field of CSR as well as for management professionals.

Working-Class Utopias Robert M. Fogelson, 2022-10-18 One of the nation's foremost urban historians traces the history of cooperative housing in New York City from the 1920s through the 1970s. As World War II ended and Americans turned their attention to problems at home, union leaders and other prominent New Yorkers came to believe that cooperative housing would solve the city's century-old problem of providing decent housing at a reasonable cost for working class families. *Working Class Utopias* tells the story of this ambitious movement from the construction of the Amalgamated Houses after World War I to the building of Co-op City, the world's largest housing cooperative, four decades later. Robert Fogelson brings to life a tumultuous era in the life of New York, drawing on a wealth of archival materials such as community newspapers, legal records and personal and institutional papers. In the early 1950s a consortium of labor unions founded the United Housing Foundation under the visionary leadership of Abraham E. Kazan, who was supported by Nelson A. Rockefeller, Robert F. Wagner Jr and Robert Moses. With the help of the state, which provided below market rate mortgages and the city, which granted tax abatements, Kazan's group built large scale cooperatives in every borough except Staten Island. Then came Co-op City, built in the Bronx in the 1960s as a model for other cities but plagued by unforeseen fiscal problems culminating in the longest and costliest rent strike in American history. Co-op City survived but the United Housing Foundation did not and neither did the cooperative housing movement. *Working Class Utopias* is essential reading for anyone seeking to understand the housing problem that continues to plague New York and cities across the nation.

Marginality and Condemnation, 3rd Edition Carolyn Brooks, Bernard Schissel, 2021-12-13T00:00:00Z Includes test bank and PowerPoint slides for professors who have adopted the text in their course. Contact examrequest@fernpub.ca for more information. This well received criminology textbook, now in its third edition, argues that crime must be understood as both a social and a political phenomenon. Using this lens, *Marginality and Condemnation* contends that what is defined as criminal, how we respond to crime and why individuals behave in anti-social ways are often the result of individual and systemic social inequalities and disparities in power. Beginning with an overview of criminological discourse, mainstream approaches and new directions in criminological theory, the book is then divided into

sections based on key social inequalities of class gender race and age each of which begins with an outline of the general issues for understanding crime and an introduction that guides readers through the empirical chapters that follow The studies provide insights into general issues in criminology ranging from the historical and current nature of crime and criminal justice to the various responses to criminality Readers are encouraged and challenged to understand crime and justice through concrete analyses rather than abstract argumentation In addition to a new introductory chapter that confronts how we define crime measure crime and understand and use criminology in this millennium the third edition provides new chapters examining crime in relation to the environment terrorism masculinity children and youth and Aboriginal gangs and the legacy of colonialism
