Private Infrastructure Development Group Great Britain. Parliament. House of Commons. Committee of Public Accounts,2015 The Department for International Development is the main funder of the Private Infrastructure Development Group a multilateral agency which invests in infrastructure projects in developing countries The Department has not used its position as by far the dominant funder of PIDG to influence the direction of its operations and improve its performance The Department s oversight of PIDG has not been sufficiently hands on The Committee is concerned that the Department has insufficient assurance over the integrity of PIDG s investments and the companies with which it works and the Department has not done enough to put a stop to PIDG s wasteful travel policies and poor financial management **British Naval**

Intelligence through the Twentieth Century Andrew Boyd,2020-08-30 This is the first comprehensive account of how intelligence influenced and sustained British naval power from the mid nineteenth century when the Admiralty first created a dedicated intelligence department through to the end of the Cold War It brings a critical new dimension to our understanding of British naval history in this period while setting naval intelligence in a wider context and emphasising the many parts of the British state that contributed to naval requirements It is also a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today and the concepts and values that underpin it The author explains

why and how intelligence was collected and assesses its real impact on policy and operations It confirms that naval intelligence was critical to Britain's survival and ultimate victory in the two World Wars but significantly reappraises its role highlighting the importance of communications intelligence to an effective blockade in the First and according Ultra less dominance compared to other sources in the Second It reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested and while British power declined rapidly after 1945 the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the twentieth century and in submarine warfare especially in the second half of the Cold War to achieve influence and impact for Britain far exceeding resources expended This compelling new history will have wide appeal to all readers interested in intelligence and its crucial impact on naval policy and operations
