The major projects report 2011 Great Britain: National Audit Office, 2011-11-16. Action taken by the Ministry of Defence to balance its overall budget in the short term following the Strategic Defence and Security Review has contributed to a near 500 million in year cost increase in the 15 largest defence projects. When coupled with previous cost growth these projects are now 6 billion above forecasts made when the main investment decisions were taken. For the third successive year central planning decisions taken by the Department including delaying various projects have had the biggest impact on cost growth accounting for 237 million of the increase. Of this 113 million relates to decisions to enhance capability. Macro economic factors such as adverse foreign exchange rates accounted for 176 million of the increase. Cost overruns from project specific technical issues accounted for 53 million. During 2010-11 there was a total increase of 30 months with an average two months per project in the forecast time to complete these projects and bring them into service. This brings the total delay on all 15 projects to 26.8 years. Long term cost analysis by the NAO has shown that the difference between the approved and forecast costs of all projects which have had their main investment decision approved since 2000 is 10.6 billion an 11.4 per cent increase. Additional costs have been avoided by reducing the amount of equipment the Department originally planned to buy. Had the Department not reduced equipment numbers cost growth could have been between 18.2 billion and 19.4 billion approximately 20 per cent above the approved costs.
