Analysing Musical Multimedia:

Analysing Musical Multimedia Nicholas Cook, 1998 *Analysing Musical Multimedia* is the first book to put forward a general theory of the manner in which different media music words moving picture and dance work together to create multimedia. Though generally associated with contemporary developments in particular music video and film, a general theory of musical multimedia also encompasses traditional genres such as song and opera. Critical writing in these areas however is genre specific. This book seeks to establish principles and a terminology for their description that apply across the whole spectrum of musical multimedia. Beginning with a study of the way in which meaning is mediated in television commercials, Cook concludes with in-depth readings of Disney's *Fantasia*, Madonna's video *Material Girl* and Armand's sequence from the collaborative film *Aria*. *Analysing Musical Multimedia* not only shows how approaches deriving from music theory can contribute to the understanding of multimedia but also seeks to draw conclusions from the practice and further development of musical analysis.

Cook looks for principles that apply across this whole spectrum.

Mediating Religion Jolyon P. Mitchell, Sophia Marriage, 2003-06-01 This is the first book to bring together many aspects of the interplay between religion, media and culture from around the world in a single comprehensive study. Leading international scholars provide the most up-to-date findings in their fields and in a readable and accessible way. Some of the topics covered include religion in the media age, popular broadcasting, communication, theology, popular piety, film and religion, myth and ritual in cyberspace, music and religion, communication ethics and the nature of truth in media-saturated cultures. The result is not only a wide-ranging resource for scholars and students but also a unique introduction to this increasingly important phenomenon of modern life.

Music and Image in Concert Meghan Stevens, 2009 In *Music and Image in Concert*, composer, graphic designer and writer Meghan Stevens explores the implications to music when images are presented in music concerts. But how do artistic directors ensure that listeners aren't more engaged by the images than the music? Stevens presents a number of concepts that aim to maintain musical salience over added image in the instrumental music concert. This is to avoid the situation that occurs in film where the music is backgrounded and often not heard or not remembered. These concepts cover a range of music-image characteristics including narrative, synchronisation, rhythm, tempo, meaning, emotion, structure, genre, integration, interpretation, voice and text. As there is little research in this new field, these original concepts draw on a number of other disciplines including film, music, video, multimedia, cognitive psychology, psychomusicology, education and music philosophy. This book provides a practical approach for adding image to the music concert.
