Ancestral Journeys Jean Manco:

Ancestral Journeys Jean Manco, 2013-10-08 Incorporates the latest discoveries and theories from archaeology genetics history and linguistics to paint a spirited history of European settlement Who are the Europeans and where did they come from In recent years scientific advances have released a mass of data turning cherished ideas upside down The idea of migration in prehistory so long out of favor is back on the agenda New advances allow us to track human movement and the spread of crops animals and disease and we can see the evidence of population crashes and rises both continent wide and locally Visions of continuity have been replaced with a more dynamic view of Europe s past with one wave of migration followed by another from the first human arrivals in Europe to the Vikings Ancient DNA links Europe to its nearest neighbors It is not a new idea that farming was brought from the Near East but genetics now reveal an unexpectedly complex process in which farmers arrived not in one wave but several Even more unexpected is the evidence that the European gene pool was stirred vigorously many times after farming had reached most of Europe Climate change played a part in this upheaval but so did new inventions such as the cart and wheeled vehicles Genetic and linguistic clues also enhance our understanding of the upheavals of the Migration Period the wanderings of steppe nomads and the adventures of the Vikings *Ancestral*

Journeys: The Peopling of Europe from the First Venturers to the Vikings (Revised and Updated Edition) Jean

Manco, 2016-02-16 An ambitious and lucid full narrative account of the peopling of Europe this will undoubtedly provide a base line for future debates on the origins of the Europeans J P Mallory author of *In Search of the Indo Europeans* and *The Origins of the Irish* Who are the Europeans Where did they come from New research in the fields of archaeology and linguistics a revolution in the study of genetics and cutting edge analysis of ancient DNA are dramatically changing our picture of prehistory leading us to question what we thought we knew about these ancient peoples This paradigm shifting book paints a spirited portrait of a restless people that challenges our established ways of looking at Europe s past The story is more complex than at first believed with new evidence suggesting that the European gene pool was stirred vigorously multiple times Genetic clues are also enhancing our understanding of European mobility in epochs with written records including the arrival of the Anglo Saxons the spread of the Slavs and the adventures of the Vikings Now brought completely up to date with all the latest findings from the fast moving fields of genetics DNA and dating Jean Manco s highly readable account weaves multiple strands of evidence into a startling new history of the continent of interest to anyone who wants to truly understand Europeans place in the ancient world [Organized Skepticism in the Age of Misinformation](#) Brett

Bourbon, Renita Murimi, 2025-03-12 Drawing from philosophy information theory and network science *Organized Skepticism in the Age of Misinformation* Surviving the Kingdom of Gossip offers a novel conceptual framework that views information as a form of gossip This book challenges the idea that truthfulness is a necessary or even a relevant condition of information Instead this book develops a conceptual framework in which information is understood as gossip which fits within a more

general account of information and knowledge as constrained but contingent social practices Using this framework this book provides a nuanced understanding of the grammar of gossip that permeates both online and real world environments and sheds light on the often overused and confused terms of our time information misinformation and knowledge This book offers a fundamental reconfiguration of the evolving virtual interdependence of humans and information technology It is a key resource for students and scholars in areas relating to social media information diffusion human computer interface and computational social science

The Five-Million-Year Odyssey Peter Bellwood, 2024-05-14 Human beings are incredibly diverse from appearance and language to culture How do we understand this diversity as a product of evolution and migration over millions of years In this book Peter Bellwood brings together biology archaeology linguistics and anthropology to provide a sweeping look at human evolution from 5 million years ago to the rise of agriculture and civilization presenting modern human diversity as a product of the shared history of human populations around the world Bellwood opens the book by explaining what allows us to understand and reconstruct the human past including the importance of archaeological biological and cultural approaches as well as an understanding of climate and chronology on vast time scales From there he proceeds forward in time from the split with chimpanzees c 6 million years ago the emergence of Homo 2 5 million years ago and the appearance of modern humans c 300 000 years ago Each chapter is driven by a set of major questions that we have new answers to such as when did human first leave Africa was Homo a new species what was the path of migration for early humans and did early humans have discernible social life and material culture Moving forward in time Bellwood describes cultural and then linguistic evolution over the last 20 000 years again driving each chapter with big questions He concludes the book by asking how much human behavior has changed based on what we know about the past and whether humans are still evolving genetically and culturally Ultimately this book shows that to understand human history and ongoing modern human diversity we must first understand human populations as a the result of millions of years of shared genetic and cultural evolution

Land of War William Nester, 2023-05-01 War in Europe began with the first human migrants Rival bands fought for thousands of years before the Greeks and Romans began writing about their military history first as legend for instance the hero Achilles battling the Trojans and then as fact War developed from sticks and stones to bronze iron and steel including armor and edged weapons Then came gunpowder guns and cannons which eventually replaced edged weapons Finally in the nineteenth and twentieth centuries technology exploded railroads steamships telegraphs machine guns automobiles airplanes and tanks enabled European states to muster equip arm transport and command more men than ever before with more firepower than ever before In the past seventy five years atomic weapons changed the military landscape of Europe as have the internet and cyber warfare In this colorful new telling of European warfare and indeed European history through the continent's all too numerous wars and conflicts William Nester describes millennia of armed conflict He covers the greatest hits of military history both ancient and current Thermopylae the Peloponnesian War the wars

of the Roman Empire across the continent the Battle of Hastings the Crusades Agincourt Waterloo Napoleon and Wellington the Somme the Spanish Civil War Stalingrad and Normandy Churchill Hitler and Stalin Bosnia and up through Putin s attempts to redraw the map of Europe Nester highlights how warfare has been deeply entwined with European statesmanship and undergirds modern institutions such as NATO and the European Union Europe s sense of itself is bound up in its military history Land of War is an epic odyssey from Europe s mythic origins through its latest violent conflicts

Skates Made of Bone B.A. Thurber,2020-03-05 Ice skates made from animal bones were used in Europe for millennia before metal bladed skates were invented Archaeological sites have yielded thousands of examples some of them dating to the Bronze Age They are often mentioned in popular books on the Vikings and sometimes appear in children s literature Even after metal skates became the norm people in rural areas continued to use bone skates into the early 1970s Today bone skates help scientists and re enactors understand migrations and interactions among ancient peoples This book explains how to make and use them and chronicles their history from their likely invention in the Eurasian steppes to their disappearance in the modern era

Private Property and the Goddess Paul Richards PhD,2023-06-19 Private Property and the Goddess explores how patriarchal private property arose in ancient times when men seized the land from woman centered cultures that grew up around the universal circle of women who nurtured humanity s children giving rise to language and culture Seizing the land required men to destroy the mother right basic to all Goddess cultures in which the land descended through the female line The only way to end the mother right was through patriarchal monogamy that ended freedom for women and inaugurated the current era of misogyny oppression and slavery The story unfolds through the author s response to American Indian Movement leader Russell Means assertion that Europeans including Marxists had proved themselves unable to respect nature and the earth Richards chronicles his own journey growing up as a red diaper baby in Oakland California and a radical student in the 1960s From there he traveled through a decades long struggle which led to his discovery of the Goddess With his growing awareness of the creative female source of life he explores the hidden story of her suppression inside the ancient origin myths of patriarchy inside Greek mythology and the one God Bible Along the way he examines Where Marx and Engels Went Wrong Was there a time when our white ancestors lived in harmony with nature How far back would we have to go to find such a time if it ever existed at all How did we lose respect for the natural world and for women The answers to these questions opens the door to finding a way to change the course of history

How Maritime Trade and the Indian Subcontinent Shaped the World Nick Collins,2022-01-28 World wide maritime trade has been the essential driver of wealth creation economic progress and global human contact Trade and exchange of ideas have been at the heart of economic social political cultural and religious life and maritime international law These claims are borne out by the history of maritime trade beginning in the Indian Ocean and connecting to Southeast Asia Japan the Americas East Africa the Middle East especially the Persian Gulf the Mediterranean and Europe This development predates the end of the Ice Age with

worldwide flooding and stimulated the establishment of land based civilizations in the above regions with particular effect on the Greek and Roman empires and even China's Celestial empire The Indian subcontinent was the original major player in maritime trade linking oceans and regions Global maritime trade declined with the fall of Mediterranean empires and the dark age in Europe but revived with Indian Ocean and Asian maritime networks Shipping and trade studies are hugely practical but can be technical legalistic and even dull for non specialists But this history is a broadly based and exciting account of human interaction at multiple levels for general readers specialists and practitioners It is based on huge reading and rare sources and with an attractive writing style and full of fascinating sidelights illuminating the historical narrative and from an author with lifelong experience in international shipping

Across a Prayerful Planet Daniel Pawley, 2022-01-18 In our mobile world travel memoirs are a staple And books about prayer line the shelves of readers who seek to grow spiritually through the timeless practice of conversing with God But books combining travel with prayer are rare and it is within this void that Daniel Pawley's masterful memoir of traveling the world with prayer as its backdrop establishes itself as an essential companion to both subjects Starting with a travel prayer template bequeathed in childhood by his parents Pawley then recalls life altering experiences as an adult in fifty locations spread across six continents each illuminated by the soulful prayers of ancient and modern seekers Inspired stops in places like exotic Bali and raucous Morocco as well as pain framed settings such as Chernobyl and Auschwitz combine to weave a tapestry seen more vibrantly in prayer's revealing light The result is a narrative of prayer's mysterious ability to provide hope and stabilizing faith in a world threatened by hate division and unbelief

Becoming an Ally, 4th Edition Anne Bishop, 2025-10-21T00:00:00Z When the bestselling first edition of *Becoming an Ally* was published in 1994 the language of ally was new Three decades later it is everywhere used misused embraced rejected and interpreted in many different ways This groundbreaking book has been used across the world by individuals and institutions to identify how privilege works and how to transform their roles in perpetuating inequality In this new edition educator Anne Bishop has updated her accessible guide on what structural oppression is and how people can work together toward equity Bishop explores oppression's impact on individuals organizations and cultures Within that larger framework she digs through decades of claims and conflicts to examine the crucial role of allies on the path toward justice This book is for social workers teachers medical professionals policy makers and anyone who wants to understand the origins of oppressive societies in order to build more just alternatives
