## **Ancient China Cloze Reading:**

**Early China/Ancient Greece** Steven Shankman, Stephen W. Durrant, 2012-02-01 This pioneering book compares Chinese and Western thought to offer a bracing and unpredictable cross cultural conversation The work contributes to the emerging field of Sino Hellenic studies which links two great and influential cultures that in fact had virtually no contact during the ancient period The patterns of thought and the cultural productions of early China and ancient Greece represent two significantly different responses to the myriad problems that human beings confront Throughout this volume the comparisons between these cultures evince two critical ideas First that thinking is itself an inherently comparative activity Through making comparisons the familiar becomes strange and the strange somewhat more familiar Second since we think through comparisons we should think them all the way through How valid and productive are the comparisons and contrasts made between particular works and different styles of thought that emerged from two different although contemporaneous cultural contexts

**Daily Life in Ancient China** Muzhou Pu, 2018-06-21 This book employs textual and archaeological material to reconstruct the various features of daily life in ancient China

*Reviving Ancient Chinese Mathematics* Jiri Hudecek, 2014-07-25 Twentieth century China has been caught between a desire to increase its wealth and power in line with other advanced nations which by implication means copying their institutions practices and values whilst simultaneously seeking to preserve China's independence and historically formed identity Over time Chinese philosophers writers artists and politicians have all sought to reconcile these goals and this book shows how this search for a Chinese way penetrated even the most central least contested area of modernity science *Reviving Ancient Chinese Mathematics* is a study of the life of one of modern China's most admired scientific figures the mathematician Wu Wen Tsun Negotiating the conflict between progress and tradition he found a path that not only ensured his political and personal survival but which also brought him renown as a mathematician of international status who claimed that he stood outside the dominant western tradition of mathematics Wu Wen Tsun's story highlights crucial developments and contradictions in twentieth century China the significance of which extends far beyond the field of mathematics On one hand lies the appeal of radical scientific modernity mechanisation in all its forms and competitiveness within the international scientific community On the other is an anxiety to preserve national traditions and make them part of the modernisation project Moreover Wu's intellectual development also reflects the complex relationship between science and Maoist ideology because his turn to history was powered by his internalisation of certain aspects of Maoist ideology including its utilitarian philosophy of science This book traces how Wu managed to combine political success and international scientific eminence a story that has wider implications for a new century of increasing Chinese activity in the sciences As such it will be of great interest to students and scholars of Chinese history the history of science and the history and philosophy of mathematics

*The Huainanzi and Textual Production in Early China*, 2014-04-03 The Han dynasty *Huainanzi* is a compendium of knowledge covering every subject from self

cultivation astronomy and calendrics to the arts of government This edited volume follows a multi disciplinary approach to explore how and why the Huainanzi was produced and how we should interpret the work The volume should be of interest to scholars of early China as well as scholars of textual production in other periods of Chinese history and in other cultures With contributions by Anne Behnke Kinney Martin Kern John S Major Andrew Meyer Judson B Murray Michael Nylan David W Pankenier Michael Puett Sarah A Queen Harold D Roth and Griet Vankeerberghen *Writing Early China* Edward L. Shaughnessy, 2023-11-01 Archaeological discoveries over the past one hundred years have resulted in repeated calls to rewrite ancient Chinese history This is especially true of documents written on oracle bones bronze vessels and bamboo strips In *Writing Early China* Edward L. Shaughnessy surveys all of these types of documents and considers what they reveal about the creation and transmission of knowledge in ancient China Opposed to the common view that most knowledge was transmitted orally in ancient China Shaughnessy demonstrates that by no later than the tenth century BCE scribes were writing lengthy texts like portions of the Chinese classics and that by the fourth century BCE the primary mode of textual transmission was by way of visual copying from one manuscript to another **Textual Patterns and Cosmic Designs in Early China** Benoît Vermander, 2024-05-30 Via a hermeneutics focused on Chinese numerology and concentric arrangements this book offers a novel construal of the textual universe proper to early China writings The author lays bare distinguishable patterns of textual composition while relating them to corresponding patterns of thinking He differentiates rhetorical variants through detailed studies of the Zhuangzi's Inner chapters the Laozi the Analects and the Huainanzi The philosophical depth and relevance of the Chinese ancient worldview appear in a fresh light when one unearths the patterns into which its content is embedded The focus on textual patterns and rhetorical arrangements also facilitates the reading of Chinese classics alongside other traditions The book will be a valuable reference for scholars and graduate students studying Chinese literary criticism Chinese philosophy and comparative philosophy **Aquinas and the Early Chinese Masters** Joshua Brown, Joshua R. Brown, 2024 *Aquinas and the Early Chinese Masters* lays intellectual foundations for the integration of Chinese philosophy into Catholic theology Although Catholic theology in Chinese contexts has drawn upon Chinese philosophical concepts few have attempted to develop a rigorous systematic approach to testing what in the Chinese philosophical traditions can be fruitful or unfruitful for Catholic theological expression This book attempts to model such an approach by engaging classical Chinese philosophy with the mind and spirit of St Thomas Aquinas who read Aristotle and other pagan philosophers with both charitable appreciation and a firm critical eye It applies this Thomistic lens through concrete comparative engagements with three main representatives of early Chinese philosophy Mencius Mengzi Xunzi and Mozi In each chapter the book presents Aquinas' thought as an evaluative frame for perceiving how Chinese philosophical commitments and concepts do or do not seem fit for adoption into Catholic theological science Following the general structure of the *Summa theologiae* the book is comprised of six chapters touching on the doctrine of God morality and

Christology The first two chapters engage Confucian master Mengzi's notion of Heaven Tian and then the Mohist doctrine of Heaven's Will Tian zhi Chapter three provides a Thomistic assessment of the two main positions in the classical Confucian debate on the goodness of man's moral nature renxing Chapter four compares Aquinas' account of charity and Mozi's doctrine of universal love jian ai Chapter 5 offers a Thomistic assessment of the possibility of understanding Christ in terms of Xunzi's sage shengren Finally Chapter 6 explores Christ as a moral teacher by putting Aquinas' reading of Matt 8:21-22 into conversation with Confucian ethics of filial virtue

### **Fin-de-siècle Russia and Chinese Aesthetics** Jinyi

Chu, 2024-08-30 Many are familiar with European modernists' interest in Chinese art and poetry; however, less well known is that Russian literature and art at the turn of the 20th century also flourished in a sustained dialogue with China. In *Fin de siècle Russia and Chinese Aesthetics*, Jinyi Chu reconsiders the place of Russia in the genealogy of global modernism by exploring the enduring impact of China on pre-revolutionary Russian culture. This book argues that fin de siècle Russian ideas about increasing global cultural and socioeconomic interconnectedness emerged from their unsettling encounters with China. Drawing on literary texts, paintings, advertisements, official documents, and archival work in Russia, China, France, and the United States, Chu reconstructs surprising stories about cultural interactions: From Innokenty Annensky's encounter with a Tibetan monk in Paris to Aleksei Remizov's adaptations of Chinese ghost stories and Lev Tolstoy's translations of the Daoist canon to Ilya Mashkov's fauvist painting of a Chinese fairy, this book presents a new cultural history of fin de siècle Russia in relation to the East. *Fin de siècle Russia and Chinese Aesthetics* casts new light on the intricate relationships between geopolitics and transnational aesthetics. It moves beyond the idea that Russian literary and artistic representations of China were simply manifestations of Russia's imperial ideology and Eurasian cultural identity. Instead, Chu shows that literature and art actively renegotiated and destabilized the preconceived world order at a time of intensifying geopolitical and cultural transformation when China shifted from Russia's rival in Inner Asia to a target in the competition of global imperialist powers.
