Language Education Under Global Neoliberalism Wang, Ai-Ling, 2025-07-25 Foreign language education is shaped by global neoliberalism, which prioritizes market-driven values like competition, individualism, and economic efficiency. In this context, language learning is often framed as a tool to enhance employability, mobility, and global competitiveness. Educational policies and curricula shift, emphasizing utilitarian outcomes and performance metrics over holistic or humanistic approaches. While this shift expands access for language learning, it also raises concerns about the commodification of language, the marginalization of less marketable languages, and the erosion of deeper intercultural understanding. Further exploration may reveal the long-term impacts of language learning and development under neoliberalist policies and ideals. *Foreign Language Education Under Global Neoliberalism* explores how global neoliberal policies influence the purpose, structure, and delivery of foreign language education, prioritizing economic utility over cultural or educational values. It examines the implications of this shift, including the commodification of language skills, the dominance of certain languages, and the impact on educational equity and cultural diversity. This book covers topics such as global business, international relations, and political science and is a useful resource for government officials, educators, academicians, researchers, and political scientists. Internationalizing Higher Education with National Characteristics: Similar Global Trends but Different Responses Min Hong, 2022-08-25 In an era of globalization internationalization of higher education IHE has been constructed as an almost inevitable trend and has become a common pursuit of many nations in their higher education HE policies This book focuses on two nations China and Australia in terms of this trend The broadest aim of this book was to find out the interactive relationships between global and national pressures in policy development by comparing the international HE policies in China and Australia The three categories overarching meta policies at the macrolevel nation institution focused policies at the mesolevel universities and people focused policies at the microlevel individuals are documented and analyzed Similarities and differences are identified Similarities include promoting and deepening IHE as one important agenda in national policies at the macrolevel in the two nations promoting transnational cooperation in the provision of HE at the mesolevel as well as increasing international student numbers and encouraging an outflow of student learning and exchanges at the microlevel Differences include China s soft power initiatives and Australia s appeal for the sustainability of international HE as a national priority in the area of IHE at the macrolevel the focus on World Class Universities construction in China and strengthening the overall HE system in Australia and different issues in relation to people mobility and brain circulation specifically encouraging more outflow of students and attracting more inflow of talents and international students in China and over reliance on international students financially in Australia It is suggested that different responses to the global trends reflect the specificities of each nation and the ways path dependent factors mediate global pressures This comparison will facilitate a better understanding of how globalization has affected and been responded to in IHE policies and enable a better understanding of their path dependent mediation through a focus on two specific sets of national policies
