Business Education Index, 1990 **Empirical Development Economics** Måns Söderbom, Francis Teal, Markus Eberhardt, Simon Quinn, Andrew Zeitlin, 2014-10-03 Understanding why so many people across the world are so poor is one of the central intellectual challenges of our time This book provides the tools and data that will enable students researchers and professionals to address that issue Empirical Development Economics has been designed as a hands on teaching tool to investigate the causes of poverty The book begins by introducing the quantitative approach to development economics Each section uses data to illustrate key policy issues Part One focuses on the basics of understanding the role of education technology and institutions in determining why incomes differ so much across individuals and countries In Part Two the focus is on techniques to address a number of topics in development including how firms invest how households decide how much to spend on their children s education whether microcredit helps the poor whether food aid works who gets private schooling and whether property rights enhance investment A distinctive feature of the book is its presentation of a range of approaches to studying development questions Development economics has undergone a major change in focus over the last decade with the rise of experimental methods to address development issues this book shows how these methods relate to more traditional ones Please visit the book s website at www.empiricalde.com for online supplements including Stata files and solutions to the exercises *Secured Transactions Law Reform in Africa* Marek Dubovec, Louise Gullifer, 2019-10-31 Over the last few decades many countries have reformed their secured transactions law One of the main reasons has been the clear link between reform and the availability of credit and the drive to improve access to finance particularly for micro small and medium sized enterprises This book focuses particularly on developing economies in Africa which have legal frameworks influenced by English French Belgian Roman Dutch and other laws Reform in this area of law across African countries has taken a number of forms which are explored and discussed in this book Secured Transactions Law Reform in Africa is a mixture of a critical description of the pre reform law and practice and the reform process itself It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms The book sets out a road map for the future of secured transactions reform primarily in Africa but also in other countries that have undertaken or are contemplating similar reforms This book is the second in a series of books about Secured Transactions Law in countries around the world and its reform both on a national and an international scale The first book Secured Transactions Law Reform Principles Policies and Practice was published in 2016 **Heterogeneous Graph Representation Learning and Applications** Chuan Shi, Xiao Wang, Philip S. Yu, 2022-01-30 Representation learning in heterogeneous graphs HG is intended to provide a meaningful vector representation for each node so as to facilitate downstream applications such as link prediction personalized recommendation node classification etc This task however is challenging not only because of the need to incorporate heterogeneous structural graph information consisting of multiple types of node and edge but also the

need to consider heterogeneous attributes or types of content e.g. text or image associated with each node. Although considerable advances have been made in homogeneous and heterogeneous graph embedding, attributed graph embedding and graph neural networks, few are capable of simultaneously and effectively taking into account heterogeneous structural graph information as well as the heterogeneous content information of each node. In this book, we provide a comprehensive survey of current developments in HG representation learning. More importantly, we present the state of the art in this field, including theoretical models and real applications that have been showcased at the top conferences and journals such as TKDE, KDD, WWW, IJCAI, and AAAI. The book has two major objectives: 1) to provide researchers with an understanding of the fundamental issues and a good point of departure for working in this rapidly expanding field, and 2) to present the latest research on applying heterogeneous graphs to model real systems and learning structural features of interaction systems. To the best of our knowledge, it is the first book to summarize the latest developments and present cutting-edge research on heterogeneous graph representation learning. To gain the most from it, readers should have a basic grasp of computer science, data mining, and machine learning.

Social Sciences Index, 1991 **Bulletin of the Public Affairs Information Service**, Public Affairs Information Service, 1989 Public Affairs Information Service Bulletin, 1988 **Proceedings of the ... European Test Conference**, 1993 **Embedded Applications**, 1995 **Clinical Evaluation and Diagnostic Tests for Neuromuscular Disorders**, Tulio E. Bertorini, 2002. This book provides expert advice from leading authorities on how and when to use the numerous evaluation tests now available for diagnosis and management of neuromuscular disorders. Its practical approach will appeal to practicing neurologists as well as neurology residents and fellows. All methods of testing and assessment are covered, and an invaluable section on protocol summarizes the material. A practical source of information on how and when to select a test, written by experts in the field. Includes all methods of neuromuscular disorder tests and assessments. Assists the practitioners in narrowing down the number of tests necessary to diagnose a condition.
