Writer B's view is: "It seems to have lost its appeal for many people". Writer C's view is: "People with a vested interest will see that human space flight is important for the prestige and glamour of space exploration and for the way it draws young minds into science and technology" but that it would be more exciting to invest the money in science education." So, A, B and C don't believe manned space flight is inspirational these days. Writer D, however, says: "People do not feel excited when they see robots launched into space. Computers attached to a rocket will not stimulate the imagination or the enthusiasm for space exploration." This implies that manned space flight is what inspires people.
- 38 D: Writer B's view is that one day there will be a major disaster and the human species may only survive by settling in a new home. If we are to have colonies on the moon or other places in space, we have no alternative but to go there ourselves." Writer C says: "In the long term, we need to find out whether we can survive outside the Earth's orbit. It's a question of species survival."
