UIST ,2001 **Information Visualization** Robert Spence,2014-11-03 Information visualization is the act of gaining insight into data and is carried out by virtually everyone It is usually facilitated by turning data often a collection of numbers into images that allow much easier comprehension Everyone benefits from information visualization whether internet shopping investigating fraud or indulging an interest in art So no assumptions are made about specialist background knowledge in for example computer science mathematics programming or human cognition Indeed the book is directed at two main audiences One comprises first year students of any discipline The other comprises graduates again of any discipline who are taking a one or two year course of training to be visual and interaction designers By focusing on the activity of design the pedagogical approach adopted by the book is based on the view that the best way to learn about the subject is to do it to be creative not to prepare for the ubiquitous examination paper The content of the book and the associated exercises are typically used to support five creative design exercises the final one being a group project mirroring the activity of a consultancy undertaking a design not an implementation for a client Engagement with the material of this book can have a variety of outcomes The composer of a school newsletter and the applicant for a multi million investment should both be able to convey their message more effectively and the curator of an exhibition will have new presentational techniques on their palette For those students training to be visual interaction designers the exercises have led to original and stimulating outcomes

The Green Executive Gareth Kane,2012-08-21 Over the last five years the corporate sustainability debate has shifted from one of compliance to one of strategic competitive advantage Accordingly responsibility for environmental and sustainability issues has risen from management functions to director level executives The Green Executive provides everything you need to know to develop a winning sustainability strategy and the leadership skills you require to implement that strategy The first part of the book explores the business case for action taking into consideration opportunities threats of inaction risks of action and the ethical dimension This is followed by an overview of global environmental problems including the big three climate change resource depletion and toxic materials and global solutions including eco efficiency and industrial ecology The third part translates these large scale solutions into practical actions for a single business ranging from simple housekeeping measures through to innovative business models The final crucial part introduces the sustainability maturity model and provides an insight into how the highest level of that model can be achieved A range of

personal views is provided in the form of 18 exclusive interviews with senior level executives from a wide range of sectors including retail transport manufacturing logistics and the service sector from small businesses through to international giants like Canon BT Marks Spencer National Express and GlaxoSmithKline

Hybrid Factories in the United States

Tetsuji Kawamura, 2011-07-07 This book assesses the transferability of Japanese style management and production systems to 81 factories in North America owned by Japanese companies All of the book's investigations are based on an original methodology hybridization analysis which quantifies the degree to which features of the Japanese system have been transplanted using an elaborate checklist and scoring system With its wealth of data it should serve as a handy reference volume to anyone interested in the issue of international management and the impact of globalization upon production models
