Envisioning the Faculty for the Twenty-First Century Adrianna Kezar,Daniel Maxey,2016-09-12 The institution of tenure once a cornerstone of American colleges and universities is rapidly eroding Today the majority of faculty positions are part time or limited term appointments a radical change that has resulted more from circumstance than from thoughtful planning As colleges and universities evolve to meet the changing demands of society how might their leaders design viable alternative faculty models for the future Envisioning the Faculty for the Twenty First Century weighs the concerns of university administrators professors adjuncts and students in order to critically assess emerging faculty models and offer informed policy recommendations Cognizant of the financial pressures that have led many universities to favor short term faculty contracts higher education experts Adrianna Kezar and Daniel Maxey assemble a top notch roster of contributors to investigate whether there are ways to modify the existing system or promote new faculty models They suggest how colleges and universities might rethink their procedures for faculty development hiring scheduling and evaluation in order to maintain a campus environment that still fosters faculty service and student centered learning Even as it asks urgent questions about how to retain the best elements of American higher education Envisioning the Faculty for the Twenty First Century also examines the opportunities that systemic changes might create Ultimately it provides some starting points for how colleges and universities might best respond to the rapidly evolving needs of an increasingly global society

Conducting Online Research on Amazon Mechanical Turk and Beyond Leib Litman,Jonathan Robinson,2020-05-12 Conducting Online

Research on Amazon Mechanical Turk and Beyond written by Leib Litman and Jonathan Robinson provides both students and experienced researchers with essential information about the online platforms most often used for social science research. This insightful and accessible text answers common questions like How do I maintain data quality in online studies? What is the best way to recruit hard to reach samples and How can researchers navigate the ethical issues that are unique to online research? Drawing on their experiences as the founders of CloudResearch formerly TurkPrime, the authors provide information that guides new users planning their first online studies and engages even the most experienced researchers with detailed discussions about the challenges of online research. The book begins with an overview of Amazon's Mechanical Turk and its rapid rise within academic research. Then the authors describe how to set up an MTurk study with screenshots that walk readers through the steps of creating an account, designing a study, collecting data, and using third-party applications to enhance MTurk's functionality. Later chapters provide readers with a detailed understanding of the MTurk environment and use data from hundreds of thousands of participants and tens of millions of completed tasks to dive into issues like participant demographics, sources of sampling bias, and the generalizability of findings from MTurk. Finally, the book explores the benefits of using other online platforms as a complement to MTurk and the ethical issues that are unique to conducting research with online participant platforms. Throughout the book, the authors share hands-on advice and best practices such as those for conducting longitudinal studies or carrying out complex studies. Altogether, the mix of data, insight, and advice make this book an essential resource for researchers who want to understand the online environment and the most effective ways to conduct research online.
