Andrew,2012-01-11 This book explores the social construction of age in the context of EFL in Mexico It is the first book to
address the age factor in SLA from a social perspective Based on research carried out at a public university in Mexico it
investigates how adults of different ages experience learning a new language and how they enact their age identities as
language learners By approaching the topic from a social constructionist perspective and in light of recent work in
sociolinguistics and cultural studies it broadens the current second language acquisition focus on age as a fixed biological or
chronological variable to encompass its social dimensions What emerges is a more complex and nuanced understanding of
age as it intersects with language learning in a way that links it fundamentally to other social phenomena such as gender
ethnicity and social class [American Headway 1. Students Book + Oxford Online Skills Program Pack](#) Liz Soars,John
