of studies on vocational education and training this review assesses vocational education and training VET in Thailand and provides policy recommendations VET has the potential to provide relevant education and training opportunities to young people and adults in Thailand especially as the demand for technical skills is high This can be achieved by building on the strengths of the system including a strong postsecondary vocational system and a small but dynamic dual system However it remains an unattractive option for many students in Thailand because of a poor image among students and parents quality issues a hard to navigate system and limited progression pathways Additional efforts are therefore needed to align the mix of provision with the needs of the Thai labour market This review provides recommendations on how to improve access to programmes reduce inequalities in access to high quality institutions and programmes make better use of skills intelligence to inform education and training policies and engage employers in the design and delivery of vocational education and training including work based learning *Extension Service Review* United States. Better Than Welfare? Kirrily Jordan,2016-08-30 The end of the very long standing Community Development Employment Projects CDEP scheme in 2015 marked a critical juncture in Australian Indigenous policy history For more than 30 years CDEP had been among the biggest and most influential programs in the Indigenous affairs portfolio employing many thousands of Aboriginal and Torres Strait Islander people More recently it had also become a focus of intense political contestation that culminated in its ultimate demise This book examines the consequences of its closure for Indigenous people communities and organisations The end of CDEP is first situated in its broader historical and political context the debates over notions of self determination versus mainstreaming and the enduring influence of concerns about passive welfare and mutual obligation In this way the focus on CDEP highlights more general trends in Indigenous policymaking and questions whether the dominant government approach is on the right track Each chapter takes a different disciplinary approach to this question variously focusing on the consequences of change for community and economic development individual work habits and employment outcomes and institutional capacity within the Indigenous sector Across the case studies examined the chapters suggest that the end of CDEP has heralded the emergence of a greater reliance on welfare rather than the increased employment outcomes the government had anticipated Concluding that CDEP was better than welfare in many ways the book offers encouragement to policymakers to ensure that future reforms generate livelihood options for Aboriginal and Torres Strait Islander Australians that are in turn better than CDEP **Position-classification Standards for**
