American Education Joel Spring 16th Edition:

American Education Joel Spring, 2015-08-14 Joel Spring's *American Education* introduces readers to the historical political social and legal foundations of education and to the profession of teaching in the United States. In his signature straightforward and concise approach to describing complex issues, Spring illuminates events and topics that are often overlooked or whitewashed, giving students the opportunity to engage in critical thinking about education. In this edition, he looks closely at the global context of education in the U.S. Featuring current information and challenging perspectives with scholarship that is often cited as a primary source, students will come away from this clear authoritative text informed on the latest topics, issues, and data, and with a strong knowledge of the forces shaping the American educational system. Changes in the 17th Edition include new and updated material and statistics on economic theories related to skills education and employability, the conflict between a skills approach and cultural diversity, political differences regarding education among the Republican, Democratic, Libertarian, and Green parties, social mobility and equality of opportunity as related to schooling, global migration and student diversity in U.S. schools, charter schools, and home schooling.

Economization of Education Joel Spring, 2015-03-27 In this timely cogent analysis of trends and powerful forces shaping global educational policy today, Joel Spring focuses on how economization is making economic growth and increased productivity the main goals of schools and the ways these goals are achieved, including measuring educational policies by their costs and economic benefits, shaping family life to ensure productive workers, and high achieving students, introducing entrepreneurship education into curricula from preschool through higher education, and increasing the involvement of economists in educational policy analysis. Close attention is given to the Organization for Economic Cooperation and Development (OECD), the World Bank, the World Economic Forum, and multinational corporations, which as advocates of economization, want schools to focus on teaching hard and soft skills needed by the global labor market. Economization raises questions about the effects of economically driven agendas for schools. Will education policies advocated by global organizations and multinational businesses corporatize and standardize human personalities and families? What type of global worker is being sought by global organizations and multinational corporations? What education programs are supported to educate the ideal global worker? What is the ideal family life for economic growth and development? Detailing and analyzing the politics and motivations driving economization, the book concludes with an assessment of the impacts of the confluence of business interests, economic theories, governments, and educators.

Citizenship Education around the World John Petrovic, Aaron Kuntz, 2014-04-24 Though certainly not a new idea, citizenship education manifests in unique and often unpredictable ways in our contemporary neoliberal era. The question of what it means to be a productive and recognized citizen must now be understood simultaneously along both global and local lines. This edited volume offers an international perspective on citizenship education enacted in specific socio-political contexts. Each chapter includes a pointed conceptualization of citizenship education, a philosophical framework that is then

applied to specific national cases across Europe Asia Canada and more Chapters emphasize how such frameworks are implemented within local contexts encouraging particular pedagogical curricular practices even as they constrain others Chapters conclude with suggestions for productive change and how educators might usefully engage contemporary contexts through citizenship education
