Occupational Outlook Quarterly ,1984

Western Aviation, Missiles, and Space ,1942

In Search of Deeper Learning Jal Mehta,Sarah Fine,2019-04-22 The best book on high school dynamics I have ever read Jay Mathews Washington Post An award winning professor and an accomplished educator take us beyond the hype of reform and inside some of America s most innovative classrooms to show what is working and what isn t in our schools What would it take to transform industrial era schools into modern organizations capable of supporting deep learning for all Jal Mehta and Sarah Fine s quest to answer this question took them inside some of America s most innovative schools and classrooms places where educators are rethinking both what and how students should learn The story they tell is alternately discouraging and hopeful Drawing on hundreds of hours of observations and interviews at thirty different schools Mehta and Fine reveal that deeper learning is more often the exception than the rule And yet they find pockets of powerful learning at almost every school often in electives and extracurriculars as well as in a few mold breaking academic courses These spaces achieve depth the authors argue because they emphasize purpose and choice cultivate community and draw on powerful traditions of apprenticeship These outliers suggest that it is difficult but possible for schools and classrooms to achieve the integrations that support deep learning rigor with joy precision with play mastery with identity and creativity This boldly humanistic book offers a rich account of what education can be The first panoramic study of American public high schools since the 1980s In Search of Deeper Learning lays out a new vision for American education one that will set the agenda for schools of the future

Education and Inequality in India Manabi Majumdar,Jos Mooij,2012-10-02 Universalization of primary education has been high on the policy agenda in India This book looks at the reproduction of social inequalities within the educational system in India and how this is contested in different ways It examines whether the concept of education for all is just a mechanically conceived policy target to chasing enrolment and attendance or whether it is a larger social goal and a deeper political statement about the need for attacking entrenched social inequalities Drawing on original data collected in the two states of Andhra Pradesh and West Bengal the authors present the multiple ways in which social class impinges on the educational system educational processes and educational outcomes The book goes on to explore issues around autonomy and accountability via an analysis of the position of teachers within the educational hierarchy and by looking at the various possibilities of making teachers accountable Recommendations related to the necessity for a larger debate and normative framework are made including

whether private schools should play a role and whether it is necessary to move from government action and responsibilities to a broader concept of public action The book presents in interesting contribution for students and scholars of South Asian studies as well as Education and Public Policy studies *Monthly Catalog of United States Government Publications* ,1993

Resources in Education ,1998 *Digest of Education Statistics* ,2000 Contains information on a variety of subjects within the field of education statistics including the number of schools and colleges enrollments teachers graduates educational attainment finances Federal funds for education libraries international education and research and development
