Question 1

11 points

Many do you think the profit margin for Anagene's cartridges has been fluctuating? Is likely attributable to the actual number of cartridges sold at this cartridge-changing, or because of the existing system they are using to calculate the cost?

The actual number of cartridges sold at this cartridge-changing has changed. The company revised the estimated number of cartridges produced and revised the calculation of the cost per unit. This led to the estimated cartridge unit cost change. Finally, company revised the cartridge unit cost and quantity sold to the actual production data.
