Translating National Identities Between China and the West Xinnian Zheng, 2025-05-30 This book explores the discursive construction of national identities in diplomatic political discourse focusing on translation's pivotal role It examines diplomatic exchanges between China and the West from 1792 to 1867 a period marked by China's national identity crisis By combining Descriptive Translation Studies DTS with Discourse Historical Approach DHA the book uncovers how translation shaped the national identities of both China and the West during a time of intercultural conflict and change Through the analysis of 29 authentic historical documents the book offers a

groundbreaking analysis of how translators at the Qing court initially portrayed China as superior and the West as inferior. However, as China's global position shifted, so did its translation strategies, gradually transforming China's national identity to be seen as equal to the West. During diplomatic interactions, translators played a crucial role in shaping perceptions of both Chinese and Western identities, thereby influencing international relations. Essential for scholars and students of translation studies, political discourse, and Chinese history, this book goes beyond traditional analysis, offering a new perspective on the intricate relationship between translation power and identity. Its blend of qualitative and quantitative methods provides a comprehensive view of East-West relations during a pivotal period in world history.

Assessing Students' Digital Reading Performance Jie HU, 2022-12-30 This book provides a systematic study of the Programme for International Student Assessment (PISA) based on big data analysis, aiming to examine the contextual factors relevant to students' digital reading performance. The author first introduces the research landscape of educational data mining (EDM) and reviews the PISA framework since its launch and how it has become an important metric to assess the knowledge and skills of students from across the globe. With a focus on methodology and its applications, the book explores extant scholarship on the dynamic model of educational effectiveness, multi-level factors of digital reading performance, and the application of EDM approaches. The core chapter on the methodology examines machine learning algorithms, hierarchical linear modeling, mediation analysis, and data extraction and processing for the PISA dataset. The findings give insights into the influencing factors of students' digital reading performance, allowing for further investigations on improving students' digital reading literacy and more attention to the advancement of education effectiveness. The book will appeal to scholars, professionals, and policymakers interested in reading education, educational data mining, educational technology, and PISA, as well as students learning how to utilize machine learning algorithms in examining the mass global database.
