Wolff-Michael Roth,2015-02-28 In qualitative research one can often hear the statement that research results are just social constructions In criminal cases and in court hearings we tend to expect that the true sequence of events has to be found rather than just any story Here the author shows that qualitative social research can be conducted in the manner of police work or court proceedings He does so by exhibiting how short pieces of transcriptions can be approached to uncover who when where and how participated what kind of social situation produced the transcription and so on without any background knowledge other than that talk itself Commenting on transcriptions of a researcher in the course of doing rigorous data analysis readers learn doing ethnographically adequate
