emerging approaches and options for management it is appropriate and timely to dress this deficiency in the orthopedic literature This volume therefore was produced in order to provide current and relevant information with content that is drawn from a very well received symposium of the same name as this book and convened in Modena Italy recently As with the symposium the specific goals of this text are to provide the most updated concepts in the management of a full spectrum of elbow pathology The content therefore is comprehensive in nature but with a focus on emerging options in the management of traumatic conditions as well as reconstructive options for the sequelae of trauma These topics are covered in detail in the 31 chapters which comprise this text The focus of each chapter was specifically designed to address the topic in the most timely fashion and with less of an emphasis on the historical context and more focus on current thinking The references documenting content are intended to be efficient and focused In addition the popular and appropriate expectation of the orthopedic community of enhanced explanation of technique are featured in the appropriate chapters
