web dec 3 2009 [style php instead of using the css file extension use php link rel stylesheet type text/css href css style php content type at the top of your new style php file set the content type back to css php header content type text/css charset utf 8 set up variables now you can set up variables for whatever you like](#)

html how to style php echo table stack overflow - Dec 27 2021

web mar 7 2014 1 with regard to styling html there s nothing special about the fact that php is outputting it you can still give your elements classes ids inline styling or whatever it s just that if php is involved you ll have to reference these in the echo output statements just change the echo statement to include classes as required e g

php php tags manual - Feb 26 2022

web php tags when php parses a file it looks for opening and closing tags which are php and which tell php to start and stop interpreting the code between them parsing in this manner allows php to be embedded in all sorts of different documents as everything outside of a pair of opening and closing tags is ignored by the php parser
