Rethinking Literary Naturalism Ian James, 2025-04-16 This book gives original readings of Proust and Quignard to elaborate a novel theory of literary naturalism Drawing on contemporary biological perspectives the book argues that despite their opposition to traditional naturalism both understand human experience meaning making and creativity as being immanent to and as emerging from shared biological life Rethinking Literary Naturalism reads contemporary biosemiotic theory Proust and Quignard alongside each other in the context of a shared genealogy that leads back into nineteenth century philosophical and literary visions of natural life that are inherited from German Romanticism and Idealism Here biological theory and forms of literary practice are recast as distinct techniques of thought that aim to situate themselves in relation to biological life Each in its own way is shown to adopt an interpretative posture that steps back into the immanence of sense and meaning that is constitutive of qualitatively lived existence Each produces a different kind of knowledge scientific literary literary philosophical of shared biological life that can be understood as distinctive variations of a saying after life The novel literary naturalism that is rethought here can be understood as post dicative and as being entirely distinct from that of mile Zola Maupassant or the Goncourt brothers Top-Down Causation and Emergence Jan Voosholz, Markus Gabriel, 2021-08-06 This book presents the latest research conducted by leading philosophers and scientists from various fields on the topic of top down causation The chapters combine to form a unique interdisciplinary perspective drawing upon George Ellis s extensive research and novel perspectives on topics including downwards causation weak and strong emergence mental causation biological relativity effective field theory and levels in nature The collection also serves as a Festschrift in honour of George Ellis 80th birthday The extensive and interdisciplinary scope of this book makes it vital reading for anyone interested in the work of George Ellis and current research on the topics of causation and emergence

General Pedagogy Martha M. A. Zama, Margaret Nalova Endeley, 2023-02-24 General Pedagogy A Guide to Effective Teaching demystifies the scientific art of teaching by providing facts principles and concrete examples in real life situations such that neither the novice teacher who peruses it will stutter in front of students on the first day of school nor will the experienced teacher write and execute the same old lesson plans on that day The best teachers are those who show you where to look but don t tell you what to see is a popular quote attributed to Alexandra K Trenfor which aptly summarises the kind of teachers this book intends to produce when used as a teacher training resource Real teachers facilitate learning they do not simply tell learners the answers to their questions and concerns Accordingly the authors take the readers through well researched themes in the academic discipline of teaching wherein they present analyse and discuss pertinent issues Although they provide useful suggestions for teaching success the authors encourage teachers to interpret facts ideas and suggestions presented against the sociocultural contexts of their practice The materials are presented creatively while adding a personal touch intended to facilitate effective and efficient learning For coherence and better comprehension the book has been carefully crafted in eighteen chapters lodged in six parts The first part introduces the reader to the concepts of teaching and

teaching effectiveness The theoretical underpinnings of these concepts are brought out in the second part which paves the way for the third part that describes generic teaching approaches strategies and methods Part four and five comprise essential teaching skills and teaching tools for the 21st century while part six wraps up with the transition from teacher training laboratories to classrooms in the real world The last two chapters intentionally prepare the teacher to overcome challenges of professional work in contemporary African classrooms

Training Readers and Writers for a Multimodal and Multimedia Society: Cognitive Aspects Ester Trigo-Ibanez, Inmaculada Clotilde Santos Diaz, Marcela Jarpa, 2024-02-07 Contemporary societies have been advancing gradually towards the construction of a model of a literate population Significant efforts have been made so that most citizens can access various sources today using their reading and writing abilities but are we really prepared to face the information age Is information literacy being promoted from schools Are individual capabilities being considered Do we have a true critical literacy This article collection

aims to show an overview of the most recent research ranging from the individual to the collective from the subject's competencies and their beliefs to the way to develop them from school. There is room in this Research Topic for investigations belonging to the linguistic, psychological and didactic field. This Research Topic aims to address a pressing problem in contemporary world societies. It is proposed to offer various contributions related to critical literacy in general and reading and writing. In this sense, research that addresses analog and digital reading writing processes, academic literacy and the use of resources such as non-fiction illustrated books to develop critical thinking will be welcome. But also and in a very important way, the cognitive processes of the subject will be considered not only to deal with access to information but also in the construction of their mental lexicon, an issue that offers the vision of the world of those who are immersed in literacy and in the post-truth era.

How to achieve the welfare state in the twenty-first century Kozulj, Roberto, 2019-09-18 Kozulj proposes a bold and vital idea if the activities linked to urban development were reoriented towards the construction and reconstruction of sustainable cities, this would tend to solve a large part of the problem of structural unemployment.

Military Review, 2014 *Aristotle on Meaning in the Living World* Peter N. Jackson, 2025-11-28 This book provides an examination of Aristotle's relevance to modern philosophy and science. It presents Aristotle's corpus as a complex and comprehensive picturing of a sublunary world in which meaning is exhibited by and shared between beings. This approach is mirrored in modern philosophy by phenomenology and in modern science by biosemiotics. Peter N. Jackson argues, however, that Aristotle overcomes the slippery subjectivism residually found even in these sympathetic modern approaches: meaning is not just how living beings perceive the world but is an inherent property of the world itself and the beings it contains. From this perspective, our vision of the world is itself incomplete and superficial if it does not recognise the ontological structures that give definition to that world or the principle of complementarity through which we can engage with the complex reality of that world. By contrast, reductionism claims to achieve a complete picture of the world but does so only by conflating philosophy, which needs to see the whole, with science, which needs to focus upon the part, and which takes from philosophy only what it needs to do so. The price of this claimed completion is profound: it is the flattening of being and the annihilation of life itself and the milieu of meaning in which it exists. This volume appeals to undergraduate and graduate students as well as researchers and helps us understand the world through science, mathematics, philosophy and religion without conflating or reducing these perspectives into one.

A Unified System Fitness Design Tra Giang Nguyen, Oliver Napila Gomez, 2024-09-24 A Unified System Fitness Design proposes a new fitness framework that encompasses all fitness indicators in a holistic and comprehensive manner, striving to provide a comprehensive and inclusive definition of physical fitness, one that considers all attributes contributing to overall well-being and crafting a flexible framework that can adapt to diverse contexts and purposes of physical fitness assessments. This new book is divided into three parts. Part I explores redefining and reconstructing the concepts of an inclusive and holistic fitness framework. In Part II, the reader is encouraged

to embark on a journey to discover the interconnected system functions of physiological health homeostasis motor control and energy regulation Part III reinforces the role of wellness in the Unified Systems Fitness Design guided by the principles of inclusion and equity in the decision making process Finally the perpetual complementation theory emerged from the design making sense of the cyclical connection between the system functions for health and skill and strengthening the Health Ability Task Suitability HATS Framework There are still many uncharted territories in the realm of fitness and wellness A Unified System Fitness Design addresses these gaps in the literature and practice and seeks to inspire a transformative worldview that urges the reader to question the existing paradigms and explore innovative inclusive approaches that cater to people with unique needs In doing so this exciting new volume aims to establish a common language for researchers and practitioners in the field offering accurate and concise descriptions of each fitness component and its associated indicators in a universally understood terminology

Biological

Identity Anne Sophie Meincke, John Dupré, 2020-08-25 Analytic metaphysics has recently discovered biology as a means of grounding metaphysical theories. This has resulted in long standing metaphysical puzzles such as the problems of personal identity and material constitution being increasingly addressed by appeal to a biological understanding of identity. This development within metaphysics is in significant tension with the growing tendency amongst philosophers of biology to regard biological identity as a deep puzzle in its own right especially following recent advances in our understanding of symbiosis, the evolution of multi cellular organisms and the inherently dynamical character of living systems. Moreover and building on these biological insights the broadly substance ontological framework of metaphysical theories of biological identity appears problematic to a growing number of philosophers of biology who invoke process ontology instead. This volume addresses this tension exploring to what extent it can be dissolved. For this purpose the volume presents the first selection of essays exclusively focused on biological identity and written by experts in metaphysics, the philosophy of biology and biology. The resulting cross disciplinary dialogue paves the way for a convincing account of biological identity that is both metaphysically constructive and scientifically informed and will be of interest to metaphysicians, philosophers of biology and theoretical biologists.
