*A Training manual in appropriate community technology*, 1982      **American Red Cross CPR Instructor's Manual**  
American Red Cross, 1988      Tests & Measurement for People Who (Think They) Hate Tests & Measurement Neil J. Salkind, 2013  
Neil J. Salkind guides readers through the fundamentals of tests and measurement using the conversational writing style and straightforward presentation techniques that have made his book *Statistics for People Who Think They Hate Statistics* an international bestseller. He provides an overview of the design of tests, the use of tests, and some of the basic social, political, and legal issues that the process of testing involves. The Second Edition includes more opportunities to practice and end-of-chapter sections that apply the material to everyday concerns regarding the assessment of behaviour.

**Anaesthesia, Pain, Intensive Care and Emergency Medicine — A.P.I.C.E.** Antonio Gullo, 2012-12-06  
This critical care medicine book substantially differs from others due to the range of peculiarities that characterize it. Since it deals with acute patients in critical conditions, this is as it were a borderline book in the sense that it is intended for those who in their activity need a continuous and in-depth interdisciplinary approach to optimize the quality of the treatments offered to critically ill patients. This book helps to have a better understanding of the current limits of human intervention and aims at supplying updated guidelines. In particular, it is intended for those who, although having to guarantee continuity and top quality therapies, must decide when and why the collaboration with and intervention by experts is necessary.      Super Student

**AAAI-92**, 1992. AAAI proceedings describe innovative concepts, techniques, perspectives, and observations that present promising research directions in artificial intelligence. The focus of the AAAI 92 conference is on the reintegration of AI as a diverse but coherent whole. Accordingly, the traditional list of community-based content areas has been replaced by a more neutral set of taxonomies that span the field. For example, a paper proposing a new epistemology for representing the physical world based on an analysis of human brain structure would be described as: representation, physical world, biological. The papers collected here represent significant research contributions to such areas as the principles underlying cognition, perception, and action in man and machine; the design, application, and evaluation of AI algorithms and systems; and the analysis of domains in which AI systems perform.
