Literary Structure and Rhetorical Strategies in The Hebrew Bible L.J. de Regt, J. de Waard, J.P. Fokkelman, 2023-08-14
Analysis of text structures has been a dominant feature in Biblical studies for quite some time. More recently, scholars have focused on rhetorical strategies that have been employed in Biblical texts. In this volume, rhetorical as well as structural approaches to the Hebrew Bible have been brought together. It contains studies on a range of topics and on a good many texts and textual corpora. Interpretation culminates in translation. The contributors to this volume have discussed the implications of their findings for Bible translators. Many of these translational implications have been put together in an epilogue. The volume thus not only intends to show the present state of our knowledge of literary and rhetorical techniques employed in the Bible, on these points it aims to be a selective guide to translators as well. The volume has been edited by Lenart de Regt, Jan de Waard, both of the Free University of Amsterdam, and Jan Fokkelman, Leiden University.

Metal Filled Polymers S.K. Bhattacharya, 1986-09-10. Discussing every aspect of the fabrication properties and use of metal filled polymers, this unique single source reference covers the full range of current and potential applications from the insulation to the conduction level. *Metal Filled Polymers* describes the most recent experimentation in determining the shielding effectiveness of plastics filled with metal, compares the advantages of metal fillers over conventional nonmetallic fillers, delineates the concept of interphase which has recently found importance in predicting the mechanism of crack growth, and shows how the geometry and orientation of filler particles affect conduction strength and stiffness under various loading conditions. In addition, the book explains how the filler interacts with the matrix to improve composite properties and details the theoretical development of both mechanical and thermal properties. Encompassing the entire literature on their respective topics, contributions by eminent researchers focus on the very latest state of the art data and relate findings directly to practical uses in current technology. *Metal Filled Polymers* will prove a vital reference for plastics materials process, chemical design, and mechanical engineers and managers in the plastics and metals industries. It will also be a useful resource for manufacturers of conductive composites for EMI shielding and professional seminars and graduate level courses in composite materials.
