Ford AOD Transmissions George Reid,2014-06-16 While millions of Ford rear wheel drive cars are equipped with the durable and simple C4 and C6 transmissions of the 1960s early in the 1980s Ford replaced those old designs with the AOD transmission for a new generation of cars Overdrive gears once popular before WWII were now becoming popular again as manufacturers were under increasing pressure to raise fuel economy to meet ever more demanding EPA standards A nice byproduct of that was more comfortable cruising speeds where your engine didn't have to work so hard in addition to getting better fuel economy In *Ford AOD Transmissions Rebuilding and Modifying the AOD AODE and 4R70W* author George Reid walks you through the process step by step from removing the transmission from the vehicle to complete disassembly and cleaning to careful reassembly to proper re installation and road testing Performance modifications are also covered as well as an ID guide for various model numbers evolutionary design changes shift kit installation and torque converter selection This book is ideal for people who already have one of these transmissions in their car as well as enthusiasts who would like to swap one of these more modern units into an older chassis to get all the benefits of overdrive If you plan on researching or working on any one of these overdrive models this book is a vital addition to your workbench or library Lemon-Aid New

combinations of commercially available technologies could greatly reduce fuel consumption in passenger cars sport utility vehicles minivans and other light duty vehicles without compromising vehicle performance or safety Assessment of Technologies for Improving Light Duty Vehicle Fuel Economy estimates the potential fuel savings and costs to consumers of available technology combinations for three types of engines spark ignition gasoline compression ignition diesel and hybrid According to its estimates adopting the full combination of improved technologies in medium and large cars and pickup trucks with spark ignition engines could reduce fuel consumption by 29 percent at an additional cost of 2 200 to the consumer Replacing spark ignition engines with diesel engines and components would yield fuel savings of about 37 percent at an added cost of approximately 5 900 per vehicle and replacing spark ignition engines with hybrid engines and components would reduce fuel consumption by 43 percent at an increase of 6 000 per vehicle The book focuses on fuel consumption the amount of fuel consumed in a given driving distance because energy savings are directly related to the amount of fuel used In contrast fuel economy measures how far a vehicle will travel with a gallon of fuel Because fuel consumption data indicate money saved on fuel purchases and reductions in carbon dioxide emissions the book finds that vehicle stickers should provide consumers with fuel consumption data in addition to fuel economy information
