Generating Transworld Pedagogy Belinda Bustos Flores, Olga A. Vásquez, Ellen Riojas Clark, 2014-02-19. Generating Transworld Pedagogy Reimagining La Clase Mágica lays the foundation for addressing one of the greatest challenges in the 21st century meeting the educational needs of a diverse society living in a complex technology driven world. It extends bilingual and bicultural transformative critical pedagogy by appropriating the use of mobile devices and digital tools within an after school setting. Four theoretical concepts anchor this collection: the dialectic method, concepts of culture, a bilingual bicultural critical pedagogy and the notion of the sacred sciences. Generating Transworld Pedagogy showcases the intersection of learners' linguistic cultural and historical knowledge as critical tools for learning and for navigating the broader society. The volume serves as an ideal framework for preparing teacher educators and teacher candidates for a world in motion. It provides a deeper understanding of the conditions needed to create the ideal learning and teaching opportunities for bilingual learners. Special highlights include a comprehensive resource for integrating linguistic and cultural diversity within a technological and global perspective for 21st

century teachers and learners a resource for launching the model in new sociocultural contexts an exemplar of the innovative uses of mobile technology and digital literacies within the learning setting and a model for engaging in socially designed community based research that can extend to an international scale Culturally Affirming Literacy Practices for Urban Elementary Students Lakia M. Scott, Barbara Purdum-Cassidy, 2016-08-17 The nation's demographic of public schools are more ethnically racially and linguistically diverse than ever before Strauss 2014 However there are still educational policies and practices that call to question whether traditionally marginalized students receive an equitable education This is demonstrated in national achievement trends which highlight disproportionality ratings among minoritized student groups Also when examining school discipline policies expulsion ratings special education services and school choice movements all seem to handicap educational opportunity for low income Black and Brown students As American schools become more and more diverse it is imperative that the literacy practices used to teach young students of color reflect the nation's changing demographic This book provides practical insights guided by conceptual and contextual knowledge in understanding how to teach urban African American and Hispanic Latino students by discussing issues associated with critical pedagogies literacy and culturally appropriate instructional strategies that have demonstrated success for traditionally marginalized student populations This book examines culturally affirming literacy practices from three main components 1 scholarship 2 the field of practice and 3 teacher education models Each of these three are significant in understanding how to teach minoritized populations As such chapters have been organized into three main sections that address scholarship and research trends in the field and implications for teacher education models all in order to advance the literacy achievement of African American and Hispanic Latino students
