Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011

Reviewing Political Criticism Elisabeth K. Chaves, 2016-04-08 Reviewing Political Criticism examines the rise of the review form of journal publication from the early eighteenth to the early twenty first centuries The review belongs to a long tradition of written political criticism that first advised then revised and with the increased confidence afforded to civil society by the rise of market capitalism subsequently challenged and even transformed the state s view on what and how it governed Chaves investigates the crucial nexus of intellectual debate with political judgment over this time and highlights the review s central role in upholding this connection Focusing upon critical moments that required the exercise of political judgment the book explains this journal form as a means of political practice one that essentially re views the state s view of how society should be ordered To understand critical activity one must reflect on where this activity takes place on the institutions of criticism that sustain it Referred to by some as the natural habitat of intellectuals journals as the institutionalized sites of theoretical discourse are

often overlooked This groundbreaking book offers a concentrated critique of the review form of journal publication as a medium for political thought and action as a decisive site for political judgment by the state s conservers and critics

Characterization of Semiconductor Heterostructures and Nanostructures Giovanni Agostini, Carlo Lamberti, 2013-04-11 Characterization of Semiconductor Heterostructures and Nanostructures is structured so that each chapter is devoted to a specific characterization technique used in the understanding of the properties structural physical chemical electrical etc of semiconductor quantum wells and superlattices An additional chapter is devoted to ab initio modeling The book has two basic aims The first is educational providing the basic concepts of each of the selected techniques with an approach understandable by advanced students in Physics Chemistry Material Science Engineering Nanotechnology The second aim is to provide a selected set of examples from the recent literature of the TOP results obtained with the specific technique in understanding the properties of semiconductor heterostructures and nanostructures Each chapter has this double structure the first part devoted to explain the basic concepts and the second to the discussion of the most peculiar and innovative examples The topic of quantum wells wires and dots should be seen as a pretext of applying top level characterization techniques in understanding the structural electronic etc properties of matter at the nanometer and even sub nanometer scale In this respect it is an essential reference in the much broader and extremely hot field of

Nanotechnology Comprehensive collection of the most powerful characterization techniques for semiconductors heterostructures and nanostructures Most of the chapters are authored by scientists that are world wide among the top ten in publication ranking of the specific field Each chapter starts with a didactic introduction on the technique The second part of each chapters deals with a selection of top examples highlighting the power of the specific technique to analyse the properties of semiconductors heterostructures and nanostructures

Understanding Management in China Malcolm Warner, 2013-11-12 China has become one of the fastest growing economies ever seen in the world in recent times In the last three decades China has transformed itself from a command economy to a market one albeit a nominally socialist one and its management systems have been reformed accordingly In the light of these changes Malcolm Warner one of the leading authorities on management in China explores the past present and future of Chinese management The first part of the work examines the history of management practices in the Middle Kingdom outlining the influence of traditional Chinese values especially the Confucian inheritance and the legacy of the imperial bureaucracy with its meritocratic examination system as well as the role of industrialization and the influx of foreign owned businesses in the late nineteenth century and the twentieth century It next goes on to consider the current state of China s management showing how a new breed of manager has evolved since the beginning of Deng Xiaoping s reforms in the late 1970s and 1980s The resulting impact of this strategy which has continued into the 1990s and the 2000s up to the present day is then examined The final part of the book concludes with reflections on how management in China is likely to develop in the near future especially on how far it will converge with global practices or to what degree an indigenous form of management with Chinese characteristics will prevail
