A Manual for Dryland Afforestation and Management G. Singh, Bilas Singh, U.K. Tomar, Shruti Sharma, 2017-01-01

Community oriented conservation of natural resources and promotion and protection of trees in drylands are examples to deal with climatic adversities. This book provides knowledge on climatic, ecological, social and economic condition of dry areas and lay out approaches and strategies to restore degraded lands. There are 15 chapters and first five deals with physiography of Rajasthan drylands, ecology, problems of land degradation, its economic evaluation and the approaches and strategies of restoration and rehabilitation. Next two chapters describe the problems of sand drift, salinity, water logging and effluent inflicted areas and strategies to control them. Chapters 8-10 deal with seed production, quality, planting materials, genetic improvement, propagation and planting techniques. Chapters 11-12 describe methods of rain water harvesting and irrigation and resources conservation for seed sowing and favouring regeneration and successions. Effective management of pests, diseases in nurseries and plantation, growth and yield prediction, equations and models and people's perception and participation in managing forest resources have been described in last 3 chapters. Purpose of this publication is to strengthen the forest functionaries and readers with wide ranging knowledge on land degradation, desertification and eco biology of drylands and methods to restore and rehabilitate degrading forest lands to increase forest cover, enhance resilience and people livelihoods and improve environmental conditions. Academician, researchers, forest managers, non government organizations, extension agents and environmentalists can use it in developing, conserving and managing drylands ecosystems for its long lasting beneficial effects. This book is also useful to policy makers in effective planning of restoring, protecting and conserving dryland's ecological and socioeconomic services.

Beyond the Checklist Suzanne Gordon, Patrick Mendenhall, Bonnie Blair O'toole, 2012-12-15

The U S healthcare system is now spending many millions of dollars to improve patient safety and inter professional practice. Nevertheless an estimated 100 000 patients still succumb to preventable medical errors or infections every year. How can health care providers reduce the terrible financial and human toll of medical errors and injuries that harm rather than heal? Beyond the Checklist argues that lives could be saved and patient care enhanced by adapting the relevant lessons of aviation safety and teamwork. In response to a series of human error caused crashes the airline industry developed the system of job training and information sharing known as Crew Resource Management (CRM). Under the new industry wide system of CRM pilots, flight attendants and ground crews now communicate and cooperate in ways that have greatly reduced the hazards of commercial air travel. The coauthors of this book sought out the aviation professionals who made this transformation possible. Beyond the Checklist gives us an inside look at CRM training and shows how airline staff interaction that once suffered from the same dysfunction that too often undermines real teamwork in health care today has dramatically improved. Drawing on the experience of doctors, nurses, medical educators and administrators this book demonstrates how CRM can be adapted more widely and effectively to health care delivery. The

authors provide case studies of three institutions that have successfully incorporated CRM like principles into the fabric of their clinical culture by embracing practices that promote common patient safety knowledge and skills They infuse this study with their own diverse experience and collaborative spirit Patrick Mendenhall is a commercial airline pilot who teaches CRM Suzanne Gordon is a nationally known health care journalist training consultant and speaker on issues related to nursing and Bonnie Blair O Connor is an ethnographer and medical educator who has spent more than two decades observing medical training and teamwork from the inside
