The Los Angeles Plaza William David Estrada,2009-02-17 2008 Gold Award in Californiana California Book Awards Commonwealth Club of California 2010 NACCS Book Award National Association for Chicana and Chicano Studies City plazas worldwide are centers of cultural expression and artistic display They are settings for everyday urban life where daily interactions economic exchanges and informal conversations occur thereby creating a socially meaningful place at the core of a city At the heart of historic Los Angeles the

Plaza represents a quintessential public space where real and imagined narratives overlap and provide as many questions as answers about the development of the city and what it means to be an Angeleno. The author, a social and cultural historian who specializes in nineteenth and early twentieth century Los Angeles, is well suited to explore the complex history and modern day relevance of the Los Angeles Plaza. From its indigenous and colonial origins to the present day, Estrada explores the subject from an interdisciplinary and multiethnic perspective, delving into the pages of local newspapers, diaries, and letters, and the personal memories of former and present Plaza residents in order to examine the spatial and social dimensions of the Plaza over an extended period of time. The author contributes to the growing historiography of Los Angeles by providing a groundbreaking analysis of the original core of the city that covers a long span of time, space, and social relations. He examines the impact of change on the lives of ordinary people in a specific place and how this change reflects the larger story of the city.

Rediscovering the Golden State William A. Selby, 2018-09-19 Now in its fourth edition, *Rediscovering the Golden State* California Geography examines this unique state's incredibly diverse landscapes and how geography and geographic change influences everything from the state's natural systems and cycles to its agriculture and more advanced industries to human migration, cultures, and urban planning. Exploring California through a geographic lens reveals how the field has evolved to cross traditional boundaries, connect local and global issues, and provide the insights that lead to practical solutions to problems, new and old. Challenging the reader to look beyond stereotypes and assumptions, this book encourages active participation in planning the state's dynamic future. And this project makes teaching and learning about the geography of California more convenient, exciting, and rewarding for instructors and students. Going beyond a scientific analysis of natural features and environmental processes, this book illustrates how social, political, and economic divides can be bridged through the study of geography and the connections it brings to light. From geology, weather, and climate, biogeography, and hydrology, we cover the state's physical geography. And from demography and migration to cultures and economies, to rural and urban geography, we monitor the state's human geography pulse and then make the vital connections. California continues to lead the nation in population, economics, 5th largest in the world, agriculture, natural and cultural diversity, and a host of other categories. This powerful state has earned this powerful publication. This timely and versatile book will prove useful to Californians in business, education, government, and to concerned citizens and curious readers seeking to learn more about the Golden State.

Pop L.A. Cécile Whiting, 2006-03-06 In this original and engaging book, Cécile Whiting examines what Pop looked like when it left the highbrow cloisters of Manhattan's art galleries and ventured westward to the sprawling suburbs of Los Angeles.

Exiled in L. A. Volker M. Welter, 2025-11-18 The first English language volume to explore the work of architect Leopold Fischer and the inaugural study of his California legacy. In 1936, Leopold Fischer, 1901

1975 in exile from Nazi Germany arrived in California where he created a small but distinct oeuvre of mostly domestic architecture. In contrast to his famous peers Rudolph Schindler and Richard Neutra immigrants whose Southern California buildings are frequently examined and who like Fischer studied with the modernist architect Adolf Loos Fischer and his California structures have until now escaped the attention of architectural history. Exiled in L A examines Fischer's important yet overlooked contributions to Southern California architecture. As the whereabouts of Fischer's archives remain unknown Volker M Welter grounds the designer's California works in comparison with his pre-exile projects and the compositions of fellow architects in California. In the 1920s Fischer created experimental working class housing estates in Germany that pioneered ecological construction and living practices. Comparable to their predecessors Fischer's California buildings revolve around the functioning the organization of a home as he defined domestic architecture in 1926. Featuring new photography and detailed architectural plans this book is an original contribution to the literature on Southern California's built heritage.

Historic Pasadena Ann Scheid, Ann Scheid Lund, 1999

Street Level: Los Angeles in the Twenty-First Century Rob Sullivan, 2016-04-01

In the latter part of the 20th a series of seminal books were written which examined Los Angeles by the likes of Reyner Banham Mike Davis Edward Soja Allen Scott Michael Dear Frederick Jameson Umberto Eco Bernard Henri Levy and Jean Baudrillard which have been hugely influential in thinking about cities more broadly. The debates which were generated by these works have tended to be very heated and either defensive or offensive in approach. A sufficient amount of time has since passed that a more measured approach to evaluating this work can now be taken. The first section of this book *Contra This and Contra That* provides such a critique of the various theories applied to Los Angeles during the last century balancing the positive with the negative. The second part of the book is an investigation of L A as it exists on the ground today. While political the theoretical stance taken in this investigation is not mounted as a platform from which to advocate a particular ideology. Instead it encompasses cultural as well as economic issues to put forth a view of L A which is coherent and cogent while at the same time considering its multi-layered complex and ever-changing qualities. It concludes by arguing that sectorized off and totalizing visions of the city will not do as instruments of urban analysis and that only a theory as mobile as its target will do one that replicates the polymer nature of this place. It proposes that extending that theory to the world beyond this particular city only a theory that models itself on the mobile and polymer nature of the world while still retaining a sense of the actual and the real will do as an instrument with which to comprehend the world. In doing so this book is not only a model by which to think through Los Angeles but as a model by which to think through other world cities.
