Epidemiology of Avian Influenza Viruses Irene Iglesias,Timothée Vergne,Mathilde C. Paul,Paolo Mulatti,Thawat Tiensin,2019-08-29 Avian influenza is a highly contagious viral disease characterized by intense circulation in the wild waterbird reservoirs with periodical introductions into the domestic poultry sector AI viruses have been the source of devastating economic losses in the poultry industry over the last three decades and have become a major veterinary and public health concern due to their zoonotic potential The most emblematic illustration of this impact has been the emergence of the HPAI H5N1 virus in southern China in the mid 1990s followed by its continental spread across East and Southeast Asia and the unprecedented epidemics recorded in 2003 2004 More recently from 2014 to 2017 several subtypes of HPAI including H5N1 H5N6 H5N8 emerged in East Asia and spread intercontinentally stressing the crucial role of this geographical hotspot as a source of new HPAI subtypes The international dimension and the difficulty to effectively control those epidemics highlight the need for a global approach to HPAI surveillance and a comprehensive knowledge on epidemiology and patterns of the disease This Research Topic aims at contributing to fill this gap It includes ten papers which supplement the knowledge of the epidemiology of AI and offer new approaches on control strategies in various regions of the world

Live Stock Journal, 1891 *Global Animal Law from the Margins* Iyan Offor, 2023-08-01 This book critically engages the emerging field of global animal law from the perspective of an intersectional ethical framework Reconceptualising global animal law this book argues that global animal law overrepresents views from the west as it does not sufficiently engage views from the Global South as well as from Indigenous and other marginalised communities Tracing this imbalance to the early development of animal law's reaction to issues of international trade the book elicits the anthropocentrism and colonialism that underpin this bias In response the book outlines a new intersectional second wave of animal ethics Incorporating marginalised viewpoints it elevates the field beyond the dominant concern with animal welfare and rights And drawing on aspects of decolonial thought earth jurisprudence intersectionality theory and posthumanism it offers a fundamental rethinking of the very basis of global animal law The book's critical yet practical new approach to global animal law will appeal to animal law and environmental law experts legal theorists and those working in the areas of animal studies and ecology **Saturday Review**, 1876 **A Comprehensive Assessment of the Role of Risk in U.S. Agriculture**

Richard E. Just, Rulon D. Pope, 2013-11-11 After all the research on agricultural risk to date the treatment of risk in agricultural research is far from harmonious Many competing risk models have been proposed Some new methodologies are largely untested Some of the leading empirical methodologies in agricultural economic research are poorly suited for problems with aggregate data where risk averse behavior is less likely to be important This book is intended to i define the current state of the literature on agricultural risk research ii provide a critical evaluation of economic risk research on agriculture to date and iii set a research agenda that will meet future needs and prospects This type of research promises to become of increasing importance because agricultural policy in the United States and elsewhere has decidedly shifted from explicit income support objectives to risk related motivations of helping farmers deal with risk Beginning with the 1996 Farm

Bill the primary set of policy instruments from U S agriculture has shifted from target prices and set aside acreage to agricultural crop insurance Because this book is intended to have specific implications for U S agricultural policy it has a decidedly domestic scope but clearly many of the issues have application abroad For each of the papers and topics included in this volume individuals have been selected to give the strongest and broadest possible treatment of each facet of the problem The result is this comprehensive reference book on the economics of agricultural risk **Toxoplasmosis** Olgica Djurković Djaković,2012-09-12 A ubiquitous organism able to infect all mammals and birds which has been estimated to infect one third of the global human population *Toxoplasma gondii* is the most successful parasite on Earth and toxoplasmosis a major zoonotic disease A current approach to this zoonosis is the one health concept based on the understanding that a disease occurring between animals and man in a specific environment can only be dealt with at the interface of all players involved This book composed of a series of articles which integrate human and animal data on toxoplasmosis by authors from all over the world offers its readers a view on the current research interests and achievements
