*Transcript of the Enrollment Books* New York (N.Y.). Board of Elections, 1953      *Role of Sex and Gender in Aging and Longevity* Calogero Caruso, 2025-08-06 *Role of Sex and Gender in Aging and Longevity* aims to shed light on the complex interplay between sex and gender differences in the aging process and longevity of individuals. While biological sex differences have long been recognized as influencing various aspects of aging, this book includes how gender also plays a significant role in shaping these processes, accelerating aging or favoring longevity. By acknowledging the influence of both biological and socially constructed factors, this book offers a comprehensive understanding of why individuals may experience different aging trajectories and have divergent longevity outcomes. This book explores the intricate ways in which gender norms, roles, and expectations shape individual experiences of aging and delves into the social determinants of health that can interact with biological factors to influence the aging process and longevity outcomes. By examining these interactions, this book aims to provide a nuanced understanding of the multifaceted nature of aging and longevity and how sex and gender contribute to these complex phenomena, laying the groundwork for future aging research and providing significant implications for disease prevention, screening, diagnosis, and treatment of age-related conditions. Explores the distinct significance of sex and gender and their interrelation with aging and longevity. Offers an in-depth overview of the sex and gender-specific biological and medical aspects of human aging and longevity. Provides the tools required to understand the challenges posed by aging and longevity in individuals and how to approach solving them.      **Paramount** Steven Bingen, 2016-12-31 *Paramount City of Dreams* brings to life the operations of the world's grandest movie lot as never before by opening its famous gates and revealing for the first time the wonderful myriad of soundstages and outdoor sets where for one hundred years Paramount has produced the world's most famous films. With hundreds and hundreds of rare and unpublished photographs in color and black and white, readers are launched aboard a fun and entertaining virtual tour of Hollywood's first, most famous, and most mysterious motion picture studio. Paramount is a self-contained city. But unlike any community in the real world, this city's streets and lawns, its bungalows and backlots will be familiar even to those who have never been there. Now for the first time, these much-filmed, much-haunted acres will be explored, and the mysteries and myths peeled away, bringing into focus the greatest of all of Hollywood's legendary dream factories.      **Aptamers for Medical Applications** Yiyang Dong, 2021-03-25 This book outlines comprehensively the main medical uses of aptamers from diagnosis to therapeutics in fourteen chapters. **Drought Stress Tolerance in Plants, Vol 1** Mohammad Anwar Hossain, Shabir Hussain Wani, Soumen Bhattacharjee, David J Burritt, Lam-Son Phan Tran,2016-05-25 Abiotic stress adversely affects crop production worldwide decreasing average yields for most of the crops to 50% Among various abiotic stresses affecting agricultural production drought stress is considered to be the main source of yield reduction around the globe Due

to an increasing world population drought stress will lead to a serious food shortage by 2050 The situation may become worse due to predicated global climate change that may multiply the frequency and duration and severity of such abiotic stresses Hence there is an urgent need to improve our understanding on complex mechanisms of drought stress tolerance and to develop modern varieties that are more resilient to drought stress Identification of the potential novel genes responsible for drought tolerance in crop plants will contribute to understanding the molecular mechanism of crop responses to drought stress The discovery of novel genes the analysis of their expression patterns in response to drought stress and the determination of their potential functions in drought stress adaptation will provide the basis of effective engineering strategies to enhance crop drought stress tolerance Although the in depth water stress tolerance mechanisms is still unclear it can be to some extent explained on the basis of ion homeostasis mediated by stress adaptation effectors toxic radical scavenging osmolyte biosynthesis water transport and long distance signaling response coordination Importantly complete elucidation of the physiological biochemical and molecular mechanisms for drought stress perception transduction and tolerance is still a challenge to the plant biologists The findings presented in volume 1 call attention to the physiological and biochemical modalities of drought stress that influence crop productivity whereas volume 2 summarizes our current understanding on the molecular and genetic mechanisms of drought stress resistance in plants
