Legal Priorities in Air Transport Ruwantissa Abeyratne, 2019-05-27

Against the backdrop of enormous technological strides, this book argues that the air transport industry must be constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods. In this regard, safety and security are of the utmost importance both in terms of safe air navigation and the preservation of human life. Although the International Civil Aviation Organization (ICAO) addresses legal issues through its Legal Committee, many emerging issues that urgently require attention lie outside the Committee's purview. This book analyzes in detail the items being considered by ICAO's Legal Committee, considers the legal nature of ICAO and discusses whether or not ICAO's scope should be extended. Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport, the book also covers a broad range of key issues outside the parameters set by ICAO, such as the need to teach air law to a new generation of aviation professionals, combating cyber crime and cyber terrorism, the regulation of artificial intelligence, traveller identification, interference with air navigation, human trafficking, unruly passengers, climate change, air carrier liability for passenger death or injury, Remotely Piloted Aircraft Systems, drones and the cabin crew and their legal implications.

International and EU Aviation Law Elmar Maria Giemulla, Ludwig Weber, 2011-01-01

This book offers an extraordinary wealth of information from the ground up of the law governing and regulating air transport today, with a strong emphasis on international aviation. A team of distinguished authors in the field of aviation law provide a cogent synthesis from which sound legal opinions and strategies of legal action may be confidently built. Among the many topics here in depth are the following: definition and classification of airspace, distinction between civil and state aircraft, air navigation and air traffic control services, airport charges and overflight charges, structure of ICAO, standard setting functions and audit functions of ICAO, functions of the International Air Transport Association (IATA), policy and effects of deregulation and liberalization of air transport policy, the International Registry for Aircraft Equipment, air carrier liability regimes and claims procedure, measures to combat aviation terrorism, air piracy and sabotage and the Open Skies Agreements. This publication cites significant legislation and court rulings including from the United States and the European Union, where far-reaching measures on market access, competition and passenger rights have set trends for other regions of the world. The special case of Latin America has a chapter to itself. At a time when commercial aircraft have been used as lethal weapons for the first time, aviation law finds itself in the front line of responsibility for maintaining global

The Transnational Dimension of Cyber Crime and Terrorism Seymour E. Goodman, Abraham D. Sofaer, 2013-11-01 In December 1999 more than forty members of government industry and academia assembled at the Hoover Institution to discuss this problem and explore possible countermeasures The Transnational Dimension of Cyber Crime and Terrorism summarizes the conference papers and exchanges addressing pertinent issues in chapters that include a review of the legal initiatives undertaken around the world to combat cyber crime an exploration of the threat to civil aviation analysis of the constitutional legal economic and ethical constraints on use of technology to control cyber crime a discussion of the ways we can achieve security objectives through international cooperation and more Much has been said about the threat posed by worldwide cyber crime but little has been done to protect against it A transnational response sufficient to meet this challenge is an immediate and compelling

necessity and this book is a critical first step in that direction **Mapping Transatlantic Security Relations** Mark B. Salter, 2010-04-15 This book examines how legal political and rights discourses security policies and practices migrate and translate across the North Atlantic The complex relationship between liberty and security has been fundamentally recast and contested in liberal democracies since the start of the global war on terror In addition to recognizing new agencies political pressures and new sensitivities to difference it is important that not to over state the novelty of the post 9 11 era the war on terror simply made possible the intensification expansion or strengthening of policies already in existence or simply enabled the shutting down of debate Working from a common theoretical frame if different disciplines these chapters present policy oriented analyses of the actual practices of security policing and law in the European Union and Canada They focus on questions of risk and exception state sovereignty and governance liberty and rights law and transparency policing and security In particular the essays are concerned with charting how policies practices and ideas migrate between Canada the EU and its member states By taking field approach to the study of security practices the volume is not constrained by national case study or the solipsistic debates within subfields and bridges legal political and sociological analysis It will be of much interest to students of critical security studies sociology law global governance and IR in general Mark B Salter is Associate Professor at the School of Political Studies University of Ottawa
