The Primate Myth Jonathan Leaf, 2025-10-21 Challenging everything we thought we knew this book takes a revolutionary look at how humans are far less like other primates than we've been led to believe and uncovers what truly sets us apart Humans are primates much like chimps or so we've been continually told Yet recent discoveries show that our species has a different brain design function and chemistry different eating sleeping mating and rearing patterns a different metabolism and a different physiology than apes Nor is our behavior much like theirs and we don't even have the feet made for climbing trees that define the primate order Could it be that conceiving of ourselves as primates isn't helping us understand what it is to be human By examining the latest research in neuroscience and genetics we are propelled toward a radically different conception of our nature In this way we can begin to grasp the distinctively human dimensions of war murder suicide and homosexuality along with our fascinations with subjects like sports politics and fashion Here is the path by which to understand our species essential problems and uncover the
