The Process of Question Answering Wendy G. Lehnert, 2022-11-01 Originally published in 1978 *The Process of Question Answering* examines a phenomenon that relies on many realms of human cognition language comprehension memory retrieval and language generation Problems in computational question answering assume a new perspective when question answering is viewed as a problem in natural language processing A theory of human question answering must necessarily entail a theory of human memory organization and theories of the cognitive processes that access and manipulate information in memory This book describes question answering as a particular task in information processing The theoretical models described here have been built on a formulation of general theories in natural language processing theories about language that were developed without the specific problem of question answering in mind By requiring programmers to be concerned with the precise form of information in memory and the precise operations manipulating that information they can uncover significant problems that would otherwise be overlooked An early insight into artificial intelligence today this reissue can be enjoyed in its historical context

Gender and Property Rights Mohammad Jabbar, 2023-04-14 On their list of 17 Sustainable Development Goals for all nations the United Nations uses 5 to achieve equality and empower all women and girls One of the nine targets under goal 5 is gender equality in the ownership of productive assets especially land by 2030 When it comes to achieving gender equality in developing countries like Bangladesh women and men s equal access to property is generally seen as a goal that is universally desirable But what if this were a wholly inappropriate metric for measuring and achieving gender equality by 2030 across diverse situations in the developing world and Bangladesh in particular This is exactly the case author and development expert Mohammad Jabbar makes in this impressive thoroughly

researched work of non fiction Among other acute insights he argues SDG target on gender equality is asset ownership by 2030 may be ill suited for the rural Bangladeshi context because of The inappropriate use of the concept of household over that of family as a survey unit for measuring its attainment The potential for the creation of superfluous junk statistics for monitoring progress that measure ownership and use rights not indicative of actual gender in equality The general lack of understanding it displays of local laws customs and norms of gender inheritance and other vital concepts related to asset ownership Thoughtful in its conception and precise in its execution this carefully argued piece of academic research is sure to make a useful even necessary addition to the bookshelves of anyone interested in development and gender equality whether they be academics policymakers researchers students or laypeople *Question Answering for the Curated Web* Rishiraj Saha Roy,Avishek Anand,2022-05-31 Question answering QA systems on the Web try to provide crisp answers to information needs posed in natural language replacing the traditional ranked list of documents QA posing a multitude of research challenges has emerged as one of the most actively investigated topics in information retrieval natural language processing and the artificial intelligence communities today The flip side of such diverse and active interest is that publications are highly fragmented across several venues in the above communities making it very difficult for new entrants to the field to get a good overview of the topic Through this book we make an attempt towards mitigating the above problem by providing an overview of the state of the art in question answering We cover the twin paradigms of curated Web sources used in QA tasks trusted text collections like Wikipedia and objective information distilled into large scale knowledge bases We discuss distinct methodologies that have been applied to solve the QA problem in both these paradigms using instantiations of recent systems for illustration We begin with an overview of the problem setup and evaluation cover notable sub topics like open domain multi hop and conversational QA in depth and conclude with key insights and emerging topics We believe that this resource is a valuable contribution towards a unified view on QA helping graduate students and researchers planning to work on this topic in the near future Yes-No Puzzles & Games Alexander Tetelbaum,2024-05-05 This unique book makes solving problems and puzzles a game and fun It contains about 100 non standard puzzles and games which can be solved by asking an unlimited number of yes no questions This new approach how to developing and mastering your critical thinking and problem solving skills does not require any specific knowledge of science mathematics physics chemistry etc Most problems are new and some are inspired by well known problems but formulated in a new form Additionally the book includes some jokes visual exercises funny tests and over 50 color illustrations that make it enjoyable to read and play games with your friends or with family during parties or in class for educational purposes Thus the book is the best gift for children and adults Note that there is one last section with problems suitable only for adults This book is written in a fashion that is easy to understand The author is a well known scientist inventor educator and entrepreneur who himself has used the technique described in the text to his benefit Advanced Topics in Power Systems Analysis Mostafa

Eidiani, Kumars Rouzbehi, 2024-09-06 Electric Power Systems Analysis is one of the most challenging courses in the Electric Power Engineering major which is taught to junior students. Its complexity arises from numerous prerequisites, a wide array of topics, and a crucial dependence on computational tools, presenting students with significant challenges. This book serves as a continuation of our previous book, Fundamentals of Power Systems Analysis 1. Problems and Solutions specifically delves into advanced topics in power systems analysis. The structure of the Advanced Topics in Power Systems Analysis is as follows: Economic Load Dispatch, Symmetrical and Unsymmetrical Short Circuits, Transient Stability Analysis, Power System Linear Controls, and Key Concepts in Power System Analysis Operation and Control. The structure of the Fundamentals of Power System Analysis 1 is as follows: Introduction to the Power System, Transmission Line Parameters, Line Model and Performance, and Power Flow Analysis. In brief, advantages associated with delving into both books are as follows: A variety of tests to prepare for employment exams. Electrical engineers practicing power system analysis can find almost everything they need. This book contains both difficult and easy problems and solutions. Readers have the capability to solve problems presented in this book solely using a calculator without dependence on computer-based software. This book provides power systems concepts through studying two-choice questions. In the end, we had a great time in writing this book and we truly hope you enjoy reading it as much as we enjoyed creating it.
