A Key Containing Solutions and Explanations of the Problems in the Last Four Books of the Elements of Geometry for the Use of Teachers Only Benjamin Greenleaf,1859 Introduction to Elliptic Curves and Modular Forms

Neal I. Koblitz,2012-12-06 This textbook covers the basic properties of elliptic curves and modular forms with emphasis on certain connections with number theory The ancient congruent number problem is the central motivating example for most of the book My purpose is to make the subject accessible to those who find it hard to read more advanced or more algebraically oriented treatments At the same time I want to introduce topics which are at the forefront of current research Down to earth examples are given in the text and exercises with the aim of making the material readable and interesting to mathematicians in fields far removed from the subject of the book With numerous exercises and answers included the textbook is also intended for graduate students who have completed the standard first year courses in real and complex analysis and algebra Such students would learn applications of techniques from those courses thereby solidifying their understanding of some basic tools used throughout mathematics Graduate students wanting to work in number theory or algebraic geometry would get a motivational example oriented introduction In addition advanced undergraduates could use the book for independent study projects senior theses and seminar work Philosophical Magazine ,1809 *Journal of the Royal Society of Arts* ,1887 *Information Relative to the Appointment and Admission of Cadets to the United States Military Academy, West Point, N.Y.* United States.
