

Optics - The Study of Light

Refraction

Light refracts when passing between two substances at an angle.

Light does not bend as glass that is not yet within water. Bending begins at boundary between air and water.

Light travels faster in water than in air, so it bends towards the normal as it enters the water.

The refractive index (n) of a substance is a measure of how much it bends light.

Reflection

Light reflects off a surface. Angle of incidence equals angle of reflection.

Normal - an imaginary line 90° perpendicular to a surface.

Angle of Incidence - the angle between the incident ray and the normal.

Angle of Reflection - the angle between the reflected ray and the normal.

Focus

Point at which parallel light rays converge after reflection from a curved surface. Focus is the focal point of a lens.

Concave Mirrors

Mirrors that curve inward. They reflect light rays that converge at a focal point. They have a focal length (f).

Convex Mirrors

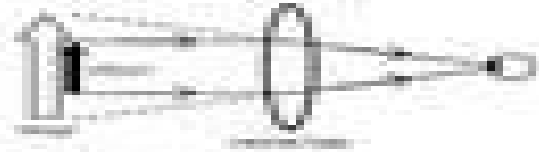

The surface is curved outwards, making it diverge light.

The image is virtual, upright, and smaller than the object.

Lenses

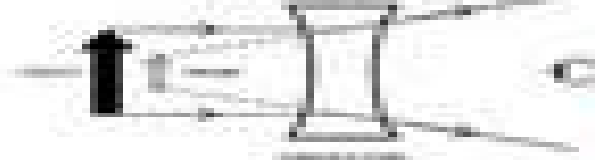

Transparent objects that refract light. They can be converging or diverging.

A converging lens focuses light.

A diverging lens spreads light out.

A diverging lens focuses light.

A converging lens is thicker in the middle.

A diverging lens is thinner in the middle.

Concave and convex mirrors and lenses have focal points. If the object is at the focal point, the image is at infinity.

Concave Mirrors

Convex Mirrors

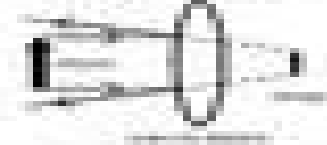

Concave mirrors and lenses can create real images. Convex mirrors and lenses can create virtual images.

Images

Images are formed by light rays. They can be real or virtual, upright or inverted, and magnified or diminished.

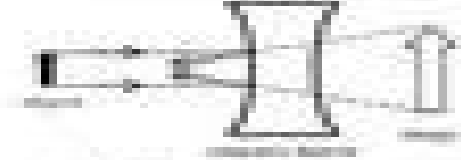

Real images are formed by converging lenses and concave mirrors. Virtual images are formed by diverging lenses and convex mirrors.

A converging lens focuses light.

A diverging lens spreads light out.

A diverging lens focuses light.

A converging lens is thicker in the middle.

A diverging lens is thinner in the middle.
