Negative Indefinites Doris Penka,2011 In this book Doris Penka delivers a cross linguistic unified analysis of the semantics and syntax of negative indefinites as in the expressions nobody nothing no as determiner never and nowhere and their counterparts in other languages While it is standard to assume that negative indefinites behave like negative quantifiers the author argues that these expressions are not inherently negative and are only licensed by a covert negation In an analysis motivated by three phenomena found in the structure and semantics of negative indefinites in different languages namely negative concord in which multiple occurrences of negative constituents express a single negation split readings in which negative and indefinite parts take scope independently of each other and the limited distribution of negative indefinites in Scandinavian languages Doris Penka considers data from a wide range of languages and reviews the most recent literature on the semantics and syntax of negative indefinites Her book will interest all linguists working on negation in particular and the syntax semantics interface more generally *Language and World* Richard Gaskin,2020-07-06 This book defends a version of linguistic idealism the thesis that the world is a product of language In the course of defending this radical thesis Gaskin addresses a wide range of topics in contemporary metaphysics philosophy of language philosophical logic and syntax theory Starting from the context and compositionality principles and the idea of a systematic theory of meaning in the Tarski Davidson tradition Gaskin argues that the sentence is the primary unit of linguistic meaning and that the main aspects of meaning sense and reference are themselves theoretical posits Ontology which is correlative with reference emerges as language driven This linguistic idealism is combined with a realism that accepts the objectivity of science and it is accordingly distinguished from empirical pragmatism Gaskin contends that there is a basic metaphysical level at which

everything is expressible in language but the vindication of linguistic idealism is nuanced inasmuch as there is also a derived level asymmetrically dependant on the basic level at which reality can break free of language and reach into the realms of the unnameable and indescribable Language and World will be of interest to scholars and advanced students working in metaphysics philosophy of language and linguistics
