 George D. Brown,Theodore E Brown,1977 **Treatise on Geomorphology** ,2013-02-27 The changing focus and approach
 of geomorphic research suggests that the time is opportune for a summary of the state of discipline The number of peer
 reviewed papers published in geomorphic journals has grown steadily for more than two decades and more importantly the
 diversity of authors with respect to geographic location and disciplinary background geography geology ecology civil
 engineering computer science geographic information science and others has expanded dramatically As more good minds are
 drawn to geomorphology and the breadth of the peer reviewed literature grows an effective summary of contemporary
 geomorphic knowledge becomes increasingly difficult The fourteen volumes of this Treatise on Geomorphology will provide
 an important reference for users from undergraduate students looking for term paper topics to graduate students starting a
 literature review for their thesis work and professionals seeking a concise summary of a particular topic Information on the
 historical development of diverse topics within geomorphology provides context for ongoing research discussion of research
 strategies equipment and field methods laboratory experiments and numerical simulations reflect the multiple approaches to
 understanding Earth s surfaces and summaries of outstanding research questions highlight future challenges and suggest
 productive new avenues for research Our future ability to adapt to geomorphic changes in the critical zone very much hinges
 upon how well landform scientists comprehend the dynamics of Earth s diverse surfaces This Treatise on Geomorphology
 provides a useful synthesis of the state of the discipline as well as highlighting productive research directions that Educators
 and students researchers will find useful Geomorphology has advanced greatly in the last 10 years to become a very
 interdisciplinary field Undergraduate students looking for term paper topics to graduate students starting a literature review
 for their thesis work and professionals seeking a concise summary of a particular topic will find the answers they need in this
 broad reference work which has been designed and written to accommodate their diverse backgrounds and levels of
 understanding Editor in Chief Prof J F Shroder of the University of Nebraska at Omaha is past president of the QG G section
 of the Geological Society of America and present Trustee of the GSA Foundation while being well respected in the
 geomorphology research community and having won numerous awards in the field A host of noted international
 geomorphologists have contributed state of the art chapters to the work Readers can be guaranteed that every chapter in
 this extensive work has been critically reviewed for consistency and accuracy by the World expert Volume Editors and by the
 Editor in Chief himself No other reference work exists in the area of Geomorphology that offers the breadth and depth of

information contained in this 14 volume masterpiece From the foundations and history of geomorphology through to geomorphological innovations and computer modelling and the past and future states of landform science no stone has been left unturned
