for a comprehensive collection of foundations and methodologies related to knowledge. While the market offers books on individual and locally developed methods, a holistic overview is currently lacking. It aims to fill that gap, inspiring projects globally and benefiting knowledge-intensive developments in both digital and traditional learning environments. Understanding the state and processes of knowledge often poses a bottleneck in the quality of designs and implementations. This book addresses this challenge by focusing on mostly automated, easy-to-implement strategies supporting the crucial task of understanding knowledge.

Techniques for Assessment of Parkinsonism for Diagnosis and Rehabilitation Sridhar P. Arjunan, Dinesh Kant Kumar, 2021-08-02. This book describes the range of technologies that have been developed for diagnosing and assessing Parkinson's disease patients. Also presenting the latest studies providing insights into the changes to the neural system in Parkinson's disease, it is a valuable resource for neurologists, general practitioners, and nurses. Further, the book highlights areas that require more research and as such will appeal to researchers, biomedical engineers, and clinicians.

Plant-Soil Interactions at Low pH: Principles and Management R.A. Date, N.J. Grundon, G.E. Rayment, M.E. Probert, 2012-12-06. The understanding of plant-soil interactions in acid soils is important for improved food production in many parts of the world. The context of the book touches on basic and applied aspects of the physics, chemistry, and biology of acid soils and their effect on growth of plants. It contains a large section on management of acid soils for plant food production and on socioeconomic aspects of management of acid soils. This is important because a large portion of the world's acid soils occurs in less developed countries. Plant-Soil Interactions at Low pH: Principles and Management contains a substantial number of papers, including nine invited reviews presented at the Third International Symposium of Plant-Soil Interactions at Low pH. The major themes include chemistry and physics of acid soils, microbial and faunal activity in acid soils, mechanisms of acid tolerance of plants, selection and breeding of acid-tolerant plants, diagnosis and correction of acid soil infertility, socioeconomic aspects of acid soil management, and management systems for agriculture, horticulture, and forestry on acid soils.

Diagnosis of Heritage Buildings by Non-Destructive Techniques Blanca Tejedor Herrán, David Bienvenido-Huertas, 2024-04-27. Besides their notable historical and cultural significance, heritage buildings crucially contribute to the economy of those countries that rely heavily on the tourism industry. Investigation and monitoring of the origins of deterioration and damage are therefore key to the preservation of architectural heritage. Diagnosis of Heritage Buildings by Non-Destructive Techniques offers an up-to-date overview of state-of-the-art knowledge by collating specialized studies written by an international group of experts in the field, while also examining the value of these non-intrusive methods through a number of real-life case studies which prove NDT techniques' global relevance. The volume is an invaluable reference resource for students, researchers, and practitioners alike. Helps readers to easily identify the latest advances in non-destructive testing by subdividing the content into sections specific

to each assessment approach Explores the integration of different NDT methodologies facilitating the interoperability of traditional and advanced technologies Presents case studies based on real built heritage to show how to correctly implement the measurement techniques described and to interpret the results
