on today's maternal newborn nursing practice. Its concise outline format covers concepts of reproduction, fetal development, normal pregnancy, intrapartum and postpartum periods, the normal newborn, complications in the mother and newborn, and ethical issues. With a fresh focus on patient safety and revised case studies, this clinical guide and certification prep tool features AWHONN endorsed content for the practice of maternal newborn nursing. AWHONN endorsed content makes this the definitive resource to prepare for current practice and specialty nursing certification examinations. Content updates throughout provide the most current practice guidelines to promote quality care. Bulleted outline format allows for quick review and reference for the management of pregnant women and their newborns through all stages of care. Contemporary content covers the full scope of maternal newborn nursing practice, incorporating information on families, ethics, legal issues, research, case management, genetics, and the transition to home and parenthood. ENHANCED Focus on patient safety draws attention to developing expertise related to safe nursing practice. UPDATED Case studies and review questions reflect the realities of practice and provide sample questions to help you prepare for certification examinations. UPDATED Content on medication safety, including high alert medications, emphasizes critical drug information that must be considered to provide safe patient care.

Textbook of Organ Transplantation Set Allan D. Kirk, Stuart J. Knechtle, Christian P. Larsen, Joren C. Madsen, Thomas C. Pearson, Steven A. Webber, 2014-07-21 Brought to you by the world's leading transplant clinicians. Textbook of Organ Transplantation provides a complete and comprehensive overview of modern transplantation in all its complexity, from basic science to gold standard surgical techniques to postoperative care and from likely outcomes to considerations for transplant program administration, bioethics, and health policy. Beautifully produced in full color throughout and with over 600 high quality illustrations, it successfully provides a solid overview of what transplant clinicians, surgeons, do and with topics presented in an order that a clinician will encounter them. Presents a holistic look at transplantation, foregrounding the interrelationships between transplant team members and non-surgical clinicians in the subspecialties relevant to pre and postoperative patient care, such as gastroenterology, nephrology, and cardiology. Offers a focused look at pediatric transplantation and identifies the ways in which it significantly differs from transplantation in adults. Includes coverage of essential non-clinical topics such as a transplant program management and administration, research design, and data collection, transplant policy, and bioethical issues. Textbook of Organ Transplantation is the market leading and definitive transplantation reference work and essential reading for all transplant surgeons, transplant clinicians, program administrators, basic and clinical investigators, and any other members of the transplantation team responsible for the clinical management or scientific study of transplant patients.
